Preface & Acknowledgements

This is the **Eighth edition** of MFIN's publication – **MicroMirror**. This publication provides an overview of the **Microfinance Universe**, including all types of lenders in the microfinance space like NBFC-MFIs, Banks, SFBs, NBFCs and others (nonprofit institutions). The report analyses the district level outreach and progress of the "Universe" with the intention to provide the required intelligence to MFIN Members and Associates to manage their district level presence in a more informed manner.

The analysis is based on **loans originated after February 2017**. This has been done to reflect the current position of the microfinance industry, by excluding the legacy accounts/portfolio resulting from the AP crisis as well as demonetization. The data is **sourced from Equifax** and we are thankful for their continued support for MFIN publications.

The report is structured into seven broad sections as below

- **Snapshot of the Microfinance Industry:** Provides "at a glance" infographic view of the microfinance industry **as on date** in terms of its size, outreach (geographical as well as operational).
- **Section 1 - The Microfinance Players:** Displays the numbers of various types of microfinance players and the extent of their geographical presence. The district level presence of institutions is depicted in a heat map.
- **Section 2 - Outreach Analysis:** Analyses the reach of the industry in terms of geographical spread (state & districts including aspirational districts with microfinance presence) and depth (proportion of potential population served).
- **Section 3 - Portfolio Analysis:** Examines the health of the portfolio, tracked down to the district level. The heat maps on PAR >30, >60, >90 and >180 days will be able to clearly depict the red flags and therefore the corrective action that the players need to take. The section also analyses the trends of portfolio growth and health.
- **Section 4 - Disbursement Analysis:** Presents the disbursements (in terms of no. of loan accounts and amount disbursed) during a completed financial year or quarter. Comparison with the corresponding period for the last financial year/quarter is also depicted to provide an understanding of the trends.
- **Section 5 - Top 10 States, Top Districts and DRI:** Illustrates the top states and districts (including aspirational districts) and analyses their contribution to the universe in terms of gross loan portfolio (GLP), outreach (accounts and unique borrowers) and portfolio quality.

The report includes an indicator developed by "MFIN Information Hub", termed as **District Risk Index (DRI)** – the explanation of this index is provided in the next page. Readers may contact the Information Hub team for any clarifications regarding this report.

Swetan Sagar, Head – Advocacy & Development
Amit Mathur, Vice President – Advocacy and Development
Rajkumar Chauhan, Manager - Information Hub

District Risk Index

District Risk Index (DRI) has been created to provide a **comprehensive picture** of risk profile of a district at a point in time. **Five parameters** have been chosen that **indicate riskiness** of microfinance operations and for which basic data is available for analysis. These parameters point towards situations that can lead to multiple loans, over-indebtedness, concentration etc. and which have in the past (and at present as well) led to crisis events. The following are the parameters

1) Multiple loans: Accounts per unique borrower

The ratio of number of accounts per unique borrower indicates the risk of multiple loans. The higher the number of loans with a borrower, the greater is the risk of getting into a debt trap. It is also difficult to manage multiple loans, as a borrower then has to attend higher number of group meetings per week/month.

2) Density of FIs: '000 potential HHs per FI

This ratio analyses number of potential households served per financial institution (FI) in a district. The lower the ratio the greater the risk and it would mean that multiple FIs are targeting common households leading to unhealthy competition.

3) Depth of outreach: Unique borrowers to potential HHs

This ratio points towards saturation level in a district. Potential households are assumed to be 70% of the total households in a district (as per census and extrapolated by a growth rate of 1.2% p.a. to the current month), with the bottom 15% and the top 15% households in terms of economic wellbeing excluded.

4) Likely indebtedness: per capita GLP to per capita GDDP

Per capita income is generally skewed by the top 15-20% of the income class who are not microfinance clients. Average loan outstanding to per capita GNI ratio of around 20-25% indicates that low-income households are targeted, and this ratio is commonly used by multilateral agencies to explain targeting. In this context, if low-income households are targeted but if per capita GLP/GNI is >30% it could mean risk of over indebtedness. Since district level GNI data is not available, Gross District Domestic Product (GDDP) has been used as a proxy for analysis.

5) Portfolio quality: PAR > 60 days

PAR > 60 days has been considered as the most suitable indicator for measuring the quality/health of the portfolio – it has neither become an NPA where risk of loss is very high, nor it takes the actual delinquency numbers (PAR > 0 days) which could be due to delayed repayment and therefore probability of recovery is better.

Each parameter individually does not provide an idea on extent of riskiness. Therefore, DRI is calculated by overlaying these five risk parameters to provide the risk profile of each district with microfinance portfolio.

- Percentile method used to assign district wise score for each parameter
- Weightage have been assigned to each parameter based on perceived degree of riskiness: 15% each to Account/Unique Borrowers & Density of FIs, 20% to Depth of Outreach (Unique/HH) and 25% each to Portfolio/GDDP (Per Capita) and PAR >60 days.
- Weighted average of the five parameters provides the Risk Index of a district
- Apart from DRI score calculated as per above conditions, if PAR >60 is more than 15%, the concerned district is considered Very High-Risk district and if PAR >60 is between 10% and 15% the district is considered High-Risk district.

DRI is meant to provide the required intelligence for taking an informed decision by members for managing their presence in a district. State/District wise DRI is presented in the **Annexes 1 and 2**.

Section 1

The Microfinance Players

Financial institutions offering microfinance

As shown in the table below, the different types of financial institutions active in the microfinance space includes NBFC-MFIs, Banks, SFBs, NBFCs and others (mainly nonprofit institutions). As on **30th June 2021**, 190 institutions were offering microfinance services across 635 districts in 37 states and union territories, with a total GLP of Rs 2,37,369 Cr with 5.68 Cr unique borrowers through 10.30 Cr accounts. There is a decrease of 8.49% in GLP as compared to last quarter-end, due to a surge in COVID cases in the Q1 of FY 21-22 which disrupted the business activities.

Entity Type	No. of institutions	No. of states where active	No. of districts where active
NBFC-MFI	85	35	610
Bank	13	37	632
SFB	8	36	611
NBFC	54	29	536
Others	30	35	575
Universe	190	37	635

Banks continue to be the largest player in the microfinance segment with contribution of 43% in terms of GLP and 36% of unique borrowers. NBFC-MFIs, are contributing 32% in terms of GLP and 33% of unique borrowers. They are followed by SFBs, NBFCs and others in that sequence.

Distribution of Unique Borrowers

Distribution of GLP

The average number of active FIs per district is 34. The **Heat Map 1** on the next page depicts the number of households (in '000s) served per FI for each district and provides an idea on "Density of FIs" which is one of the risk parameters for DRI. At an all-India level, the density of FIs is 1,053 which means that for every 1,053 thousand potential household there is an active financial institution.

Heat Map 1: FIs presence at district level ('000 HHs per FI) – DRI parameter

As evident from the map, central India (parts of Madhya Pradesh and Jharkhand) and parts of east and north-east India have higher density of FIs ('000 potential HHs per FI). However, a higher density of FIs shown in North-East may be due to low/scattered population as well.

Section 2

Outreach Analysis

Client coverage

As of 30th June 2021, the microfinance industry has attained an outreach of 5.68 Cr unique borrowers through 10.30 Cr accounts. This translates into 1.81 accounts per unique borrower. There is a continuous drop in portfolio due to disruption of operations caused by COVID. **Heat Map 2** on the next page illustrates the district wise ratio of accounts per borrower.

	30 Apr 21	31 May 21	30 June 21
Loan accounts (Cr)	10.74	10.60	10.30
Unique borrowers (Cr)	5.89	5.78	5.68
Ratio (accounts/borrower)	1.82	1.83	1.81

The number of (ever) loan accounts have grown by a CAGR of 13.70% since March 2017. The loan accounts created based on loans originated after February 2017 is now 96.52% of ever accounts as shown in the graph below. District wise spread of the number of accounts is shown in **Heat Map 3**.

Depth of outreach indicates the proportion of potential households reached by microfinance. The universe depth of outreach is 28.36% which means that there is significant scope for the microfinance players to grow and expand. The district wise depth of outreach is presented in **Heat Map 4** and the depth of outreach in Aspirational Districts is separately shown in **Heat Map 5**.

Heat Map 2: Multiple loans (accounts per unique borrowers) – **DRI parameter**

Heat Map 3: District wise loan accounts ('000)

Heat Map 4: Depth of outreach (% of potential HHs reached) – [DRI parameter](#)

Heat Map 5: Depth of outreach in Aspirational districts

Section 3

Portfolio Analysis

Portfolio growth and PAR trend

The industry GLP as on 30th June 2021 has reached Rs 2,37,369 Cr, of loans originated after February 2017 – district wise GLP is shown in **Heat Map 6**. This is now 97.70% of the ever GLP which grew by a CAGR of 23.28% since March 2017. The average outstanding portfolio per account is Rs 23,050 and per unique borrower is Rs 41,818. The graph below shows the growth of GLP since Mar'17. District wise average loan outstanding per account and per unique borrower is presented in **Heat Maps 7 and 8**.

As on 30th June 2021 PAR >30 is 22.44%, which has increased in comparison to last quarter mainly due to pandemic affecting the operations severely in the Q1 FY 21-22. The NPA as depicted by PAR >90 days of 9.79% which is also on an increasing trend on a QoQ basis. Historically, the NPA was below 1%. The graph below shows the PAR trends, and the **Heat Map 9** displays the district wise PAR >60 which is one of the risk parameters for DRI. **State and district wise details are in Annex 1 and 2.**

Heat Map 10, illustrates the district wise likely indebtedness based on the ratio of per capita GLP to per capita GDDP. The GLP/GDP (per capita) ratio for India is 32.40%. This ratio has increased over last quarter as GDP has shown steep decline as compared to portfolio.

Heat Map 6: Gross loan portfolio (Rs Cr)

Heat Map 7: Average loan outstanding per account (Rs)

Heat Map 8: Average loan outstanding per unique borrower (Rs)

Heat Map 9: Portfolio at Risk > 60 days – DRI Parameter

Heat Map 10: Per Capita GLP to Per Capita GDDP ratio – **DRI Parameter**

Section 4

Disbursement Analysis

Disbursement trend

Total amount of loan disbursed during the FY 2021-22 till Q1 FY 21-22 is Rs 25,503 Cr to 0.17 Cr accounts with average loan size per account 36,085. Table below compares the disbursements as well as average loan size per account made in the previous two FY with current FY till the quarter end.

	FY 2019-20	FY 2020-21	FY 2021-22 till Q1
Loan amount disbursed (Rs Cr)	2,27,804	1,88,471	25,503
Accounts disbursed (Cr)	6.70	5.17	0.17
Average loan size per account (Rs)	34,015	36,444	36,085

The quarterly disbursement trend since March 2017 is shown in the graph below. It is evident that every year quarter one remains sluggish, and disbursement picks up in the later quarters of the financial year. Q1 FY 21-22 has been significantly better in terms of disbursement as compared to Q1 FY 20-21 despite surge in cases during the quarter.

The district wise loan amount disbursed during the Q1 FY 21-22 is displayed in **Heat Map 11** and the average loan disbursed per account is presented in **Heat Map 12**. It is evident that

- 313 districts had average loan size higher than the country average
- Of them 163 districts had average loan size >Rs 40,000, 52 have >Rs 50,000 and 24 have >Rs 60,000.
- 39 out of 52 districts with average loan size >Rs 50,000 are from East and North East region.
- Distribution of districts with >50,000 average loan disbursed amount is – Nagaland (11), Uttarakhand (8), Assam and Manipur (6), Arunachal Pradesh, Meghalaya, Sikkim and Tripura (3), Mizoram, Uttar Pradesh and West Bengal (2), Dadra and Nagar haveli (1)

Heat Map 11: Loan amount (Rs Cr) disbursed during FY 2019-20

Heat Map 12: Average loan disbursed per account (Rs) during FY 2019-20

Section 5

Top States, Top Districts & DRI

Top ten states

As on 30th June 2021, the Top 10 states in terms of GLP, account for 81.96% of the universe GLP. The contribution of these states in terms of accounts and unique borrowers is also very significant as shown in the table below.

	GLP (Rs Cr)	Accounts (Cr)	Unique Borrowers (Cr)
Top 10 States (in GLP)	1,94,546	8.36	5.28
Universe	2,37,369	10.30	5.68
Contribution of Top 10	81.96%	81.18%	92.95%

The GLP of Top 10 states and average loan outstanding per account and per unique borrower is shown in the figure below. The **largest state is West Bengal** with a GLP of Rs 34,587 Cr followed by **Tamil Nadu** having a GLP of Rs 29,982 Cr.

The contribution of Top 10 states to universe PAR >30 is 80.29% and to PAR >90 is 84.94%. The Top 5 PAR contributing states are Tamil Nadu, West Bengal, Karnataka, Kerala and Assam. Together they account for 75.50% of universe PAR >30 and 66.37% of PAR >90.

Top districts

As evident from the table below, while microfinance is present in 635 districts, the operations are concentrated in the Top 300 districts which contribute to almost 88.90% of the universe GLP. Microfinance services are being provided in 112 out of 115 aspirational districts and their contribution to the universe GLP is about 14.41%, though the depth of outreach is lower than the Top 300 districts indicating good scope of expansion in these districts.

Districts	GLP (Rs Cr)	GLP (% of Univ.)	Unique Borrowers (Cr)	UB (% of Univ.)	Depth of outreach
Top 100	1,22,645	51.67%	3.13	48.06%	50.47%
Top 200	1,77,677	74.85%	4.66	71.58%	47.76%
Top 300	2,11,011	88.90%	5.67	87.05%	44.28%
Remaining 335	26,358	11.10%	0.84	12.95%	12.27%
Aspirational 112	34,205	14.41%	0.98	15.03%	33.76%
Universe	2,37,369		5.68		28.36%

The graph below compares the growth of portfolio based on data on loans originated after February 2017. The CAGR GLP from March 17 to June 21 for 'ever' loans has been 25.19%, 32.40% and 79.39% respectively for Top 300, remaining and aspirational districts. It does indicate that the FIs continue to see the aspirational districts as a good business avenue.

The PAR analysis of Top districts in comparison to remaining and aspirations districts is shown in the graph below. PAR levels of Top 300 districts are worse off as compared to remaining districts due to impact of COVID being higher in larger cities. 51 aspirational districts feature in Top 300 down from 52 at the end of last quarter.

District Risk Index

The DRI provides a consolidated view of district wise risk in microfinance operations. As explained in the note on page 4, DRI takes into account five risk factors to calculate the index– multiple loans, density of FIs, depth of outreach, indebtedness and portfolio quality as measured by PAR 60.

For analysis, the DRI has been classified into five categories based on combined risk scores of all parameters. These are

Very High: >75%

High: >=60% to 75%

Moderate: >=45% to <60%

Low: >=25% to <45%

Very Low: <25%

The table below shows the number of districts in various DRI categories. Districts with very high and high DRI are 56.38% of the 635 districts where microfinance operations are present. Districts with moderate DRI are around 17.80% of the total and 25.83% have low and very low DRI. It is also evident that not every large district in terms of GLP feature in Very-High or High, risk category. However, none of them feature in the very low risk category.

Heat Map 13 on the next page depicts the district wise DRI. The major states with large number of districts featuring in Very-High and High, risk categories are as below

- Very High: Assam (23), Chhattisgarh, Madhya Pradesh and Maharashtra (14), West Bengal (11), Kerala (10), Nagaland and Delhi (9), Punjab (6), Arunachal Pradesh, Gujrat, Jammu & Kashmir, Karnataka and Meghalaya (5), Himachal Pradesh (4), Manipur, Andaman & Nicobar Island and Odisha (3), Rajasthan, Tamil Nadu and Bihar (2) and 7 states with 1 district each.
- High: Madhya Pradesh (27), Odisha (23), Bihar (22), Tamil Nadu (17), Jharkhand (15), Gujarat (14), Karnataka (11), West Bengal (9), Maharashtra (8), Uttar Pradesh (6), Uttarakhand and Rajasthan (5), Punjab, Chhattisgarh, Kerala and Tripura (4), Haryana (3), Himachal Pradesh, Andhra Pradesh, and Goa (2) and 10 states with 1 district each.

DRI	No. of districts	% of Universe GLP	Of which in Top 100	Of which in Top 200	Of which in Top 300
Very High	161	30.75%	31	62	83
High	197	37.78%	42	78	119
Moderate	114	23.88%	25	53	79
Low	111	6.73%	2	7	19
Very Low	52	0.85%	0	0	0

Heat Map 13: District Risk Index

Annex 1: State Wise Data

State	No of Active FI's	GLP (Cr)	GLP Rank	Unique Borrowers ('000)	No of Active Accounts ('000)	PAR >0	PAR >30	PAR >60	PAR >90	PAR >180
Andaman & Nicobar	19	4.0	36	1.7	1.9	54.10%	38.81%	23.79%	14.60%	6.43%
Andhra Pradesh	32	1,231.2	18	370.0	448.2	12.08%	7.44%	3.96%	2.14%	1.11%
Arunachal Pradesh	9	20.2	32	7.5	8.0	42.18%	19.24%	8.06%	5.73%	4.30%
Assam	40	11,262.2	9	2,412.0	4,050.8	57.97%	48.07%	33.83%	29.78%	23.27%
Bihar	69	26,996.8	3	7,940.7	11,747.2	21.87%	10.82%	6.40%	4.67%	2.96%
