Preface & Acknowledgements

This is the **first edition** of MFIN's new publication – **MicroMirror**. This publication provides an overview of the **Microfinance Universe**, including all types of lenders in the microfinance space like Banks, NBFC-MFIs, SFBs, NBFCs and others (nonprofit institutions). The report analyses the district level outreach and progress of the “Universe” with the intention to provide the required intelligence to MFIN Members and Associates to manage their district level presence in a more informed manner.

The analysis is based on **loans originated after February 2017**. This has been done to reflect the current position of the microfinance industry, by excluding the legacy accounts/portfolio resulting from the AP crisis as well as demonetization. The data is **sourced from Equifax** and we are thankful for their continued support for MFIN publications.

The report is structured into seven broad sections as below

- **Snapshot of the Microfinance Industry:** Provides “at a glance” infographic view of the microfinance industry **as on date** in terms of its size, outreach (geographical as well as operational).
- **Section 1 - The Microfinance Players:** Displays the numbers of various types of microfinance players and the extent of their geographical presence. The district level presence of institutions is depicted in a heat map.
- **Section 2 - Outreach Analysis:** Analyses the reach of the industry in terms of geographical spread (state & districts including aspirational districts with microfinance presence) and depth (proportion of potential population served).
- **Section 3 - Portfolio Analysis:** Examines the health of the portfolio, tracked down to the district level. The heat maps on PAR >30, >60, >90 and >180 days will be able to clearly depict the red flags and therefore the corrective action that the players need to take. The section also analyses the trends of portfolio grown and its health is also presented.
- **Section 4 - Disbursement Analysis:** Presents the disbursements (in terms of no. of loan accounts and amount disbursed) during a completed financial year or quarter. Comparison with the corresponding period for the last financial year/quarter is also depicted to provide an understanding of the trends.
- **Section 5 - Top 10 States, Top Districts and DRI:** Illustrates the top states and districts (including aspirational districts) and analyses their contribution to the universe in terms of gross loan portfolio (GLP), outreach (accounts and unique borrowers) and portfolio quality.
- **Case Study:** One state will be selected by the Secretariat for an in-depth analysis with depiction of district level performance on various parameters in the form of heat maps. Odisha has been selected for case study for this edition of the report.

The report also includes an indicator developed by “MFIN Information Hub”, termed as **District Risk Index (DRI)** – the explanation of this index is provided in the next page. Readers may contact the Information Hub team for any clarifications regarding this report.

Amit Mathur, Vice President – Advocacy and Development
Rajkumar Chauhan, Manager - Information Hub

District Risk Index

District Risk Index (DRI) has been created to provide a **comprehensive picture** of risk profile of a district at a point in time. **Five parameters** were chosen that **indicate riskiness** of microfinance operations and for which basic data is available for analysis. These parameters point towards situations that can lead to multiple loans, over-indebtedness, concentration etc. and which have in the past (and at present as well) led to crisis events. The following are the parameters

1) Multiple loans: Accounts per unique borrower

The ratio of number of accounts per unique borrower indicates the risk of multiple loans. The higher the number of loans with a borrower, the greater is the risk of getting into a debt trap. It is also difficult to manage multiple loans, as a borrower then has to attend higher number of group meetings per week/month.

2) Density of FIs: '000 potential HHs per FI

This ratio analyses number of potential households served per financial institution (FI) in a district. The lower the ratio the greater the risk and it would mean that multiple FIs are targeting common households leading to unhealthy competition.

3) Depth of outreach: Unique borrowers to potential HHs

This ratio points towards saturation level in a district. Potential households are assumed to be 70% of the total households in a district (as per census and extrapolated by a growth rate of 1.2% p.a. to the current month), with the bottom 15% and the top 15% households in terms of economic wellbeing excluded.

4) Likely indebtedness: per capita GLP to per capita GDDP

Per capita income is generally skewed by the top 15-20% of the income class who are not microfinance clients. Average loan outstanding to per capita GNI ratio of around 20-25% indicates that low income households are targeted, and this ratio is commonly used by multilateral agencies to explain targeting. In this context, if low income households are targeted but if per capita GLP/GNI is >30% it could mean risk of over indebtedness. Since district level GNI data is not available, Gross District Domestic Product (GDDP) has been used as a proxy for analysis.

5) Portfolio quality: PAR > 60 days

PAR > 60 days has been considered as the most suitable indicator for measuring the quality/health of the portfolio – it has neither become an NPA where risk of loss is very high, nor it takes the actual delinquency numbers (PAR > 0 days) which could be due to delayed repayment and therefore probability of recovery is better.

Each parameter individually does not provide an idea on extent of riskiness. Therefore, DRI is calculated by overlaying these five risk parameters to provide the risk profile of each district with microfinance portfolio.

- Percentile method used to assign district wise score for each parameter
- Equal weightage given to each parameter (20%)
- Average of scores of the five parameters provides the Risk Index of a district

Together with the **Radar** tool, which is being prepared by the State Initiatives Vertical, DRI will provide **complete risk status of a district** and the required intelligence to MFIN members/associates to take an informed decision for managing their presence in a district.

District wise DRI is presented in the **Annexure**.

Snapshot of the Microfinance Industry

Section 1

The Microfinance Players

Financial institutions offering microfinance

As shown in the table below, the different types of financial institutions active in the microfinance space includes NBFC-MFIs, Banks, SFBs, NBFCs and others (mainly nonprofit institutions). As on **31st August 2019**, 163 institutions were offering microfinance services across 619 districts in 36 states and union territories, with a total GLP of Rs Rs 197,386 Cr with 5.37 Cr unique borrowers through 9.62 Cr accounts.

Entity Type	No. of institutions	No. of states where active	No. of districts where active
NBFC-MFI	86	35	601
Bank	12	36	619
SFB	8	36	593
NBFC	40	29	522
Others	17	21	382
Universe	163	36	619

Banks are now the largest player in the microfinance segment with contribution of 40.5% in terms of GLP and 44.4% of unique borrowers. NBFC-MFIs, which used to be the most significant player now contribute 30.8% in terms of GLP and 44.4% of unique borrowers. They are followed by SFBs, NBFCs and other in that sequence.

Distribution of unique borrowers

Distribution of GLP

The average number of active FIs per district around 31. The **Heat Map 1** on the next page depicts the number of households (in '000s) served per FI for each district and provides an idea on "Density of FIs" which is one of the risk parameters for DRI. At an all India level, the density of FIs is 1,189 which means that for every 1,189 thousand potential household there is an active financial institution.

Heat Map 1: FIs presence at district level ('000 HHs per FI) – DRI parameter

As evident from the map, central India (parts of Madhya Pradesh and Jharkhand) and parts of east and north east India have higher density of FIs ('000 potential HHs per FI). However, a higher density of FIs shown in North East may be due to low/scattered population as well.

Section 2

Outreach Analysis

Client coverage

As on 31st August 2019, the microfinance industry has attained an outreach of 5.37 Cr unique borrowers through 9.62 Cr accounts. This translates into 1.79 accounts per unique borrower and has fluctuated over the past three months (for which the data is available) as shown below. The **Heat Map 2** on the next page illustrates the district wise ratio of accounts per borrower.

	30 Jun 19	31 Jul 19	31 Aug 19
Loan accounts (Cr)	9.27	9.71	9.62
Unique borrowers (Cr)	5.20	5.29	5.37
Ratio (accounts/borrower)	1.78	1.84	1.79

The number of (ever) loan accounts have grown by a CAGR of 21.9% since March 2017. The loan accounts created based on loans originated after February 2017 is now 95.4% of ever accounts as shown in the graph below. District wise spread of number of accounts is shown in **Heat Map 3**.

Depth of outreach indicates the proportion of potential households reached by microfinance. The universe depth of outreach is 27.7% which means that there is significant scope for the microfinance players to grow and expand. The district wise depth of outreach is presented in **Heat Map 4** and the depth of outreach in Aspirational Districts is separately shown in **Heat Map 5**.

Heat Map 2: Multiple loans (accounts per unique borrowers) – **DRI parameter**

Heat Map 3: District wise loan accounts ('000)

Heat Map 4: Depth of outreach (% of potential HHs reached) – DRI parameter

Heat Map 5: Depth of outreach in Aspirational districts

Section 3

Portfolio Analysis

Portfolio growth and PAR trend

The industry GLP as on 31st August 2019 has reached Rs 1,97,386 Cr, of loans originated after February 2017 – district wise GLP is shown in **Heat Map 6**. This is now 96.8% of the ever GLP which grew by a CAGR of 33.4% since March 2017. The average portfolio per account is Rs 20,514 and per unique borrower is Rs 36,776. The graph below shows the growth of GLP since Mar'17. District wise average loan outstanding per account and per unique borrower is presented in **Heat Maps 7 and 8**.

In just 29 months since origination in February 2017, the PAR >30 of such loans has steadily increased to 2.13% while the NPA as depicted by PAR >90 days is 1.55%. Historically, the NPA of the sector has been below 1% and therefore this quick increase should be a cause of concern for the industry. The graph below shown the PAR trend and the **Heat Map 9** displays the district wise PAR >60 which is one of the risk parameters for DRI. **State and district wise** details are in **Annex 1 and 2**.

Heat Map 10, illustrates the district wise likely indebtedness based on the ratio of per capita GLP to per capita GDDP. The GLP/GDP (per capita) ratio for India is 24.7%.

Heat Map 6: Gross loan portfolio (Rs Cr)

Heat Map 7: Average loan outstanding per account (Rs)

Heat Map 8: Average loan outstanding per unique borrower (Rs)

Heat Map 9: Portfolio at Risk > 60 days

Heat Map 10: Per Capita GLP to Per Capita GDDP ratio – **DRI Parameter**

Section 4

Disbursement Analysis

Disbursement trend

The total amount of loan disbursed during the FY 2019-20 (Apr to Aug) is Rs 89,214 Cr to 2.7 Cr accounts. In the last two completed FYs (2017-18 and 2018-19) the disbursements grew by 36%. The average loan size (per account) has increased by 20% from Rs 27,568 for the FY 2017-18 to Rs 33,090 for the FY 2019-20 (up to August) as shown in the table below.

	FY 2017-18	FY 2018-19	FY 2019-20
Loan amount disbursed (Rs Cr)	1,46,225	1,98,992	89,214
Accounts disbursed (Cr)	5.30	6.31	2.70
Average loan size per account (Rs)	27,568	31,520	33,090

The quarterly disbursement trend since March 2017 is shown in the graph below. It is evident that in each financial year the disbursements peaked (both in terms of amount disbursed as well as average loan size per account) during the last quarter (Jan-Mar) while in the other quarters there is a steady growth. The dip for Aug'19 is because the quarter (Jul-Sep) will complete in Sep'19 and expected to have a similar trend.

The district wise loan amount disbursed during the FY 2019-20 (Apr to Aug) is displayed in **Heat Map 11** and the average loan disbursed per account is presented in **Heat Map 11**. It is evident that

- 213 districts had average loan size higher than the country average
- Of them 93 districts had average loan size >Rs 40,000, 22 have >Rs 50,000 and 5 have >Rs 60,000
- Districts with average loan size >40,000 are from Andaman (1), Andhra Pradesh (1), Arunachal Pradesh (5), Assam (20), Dadra & Nagar Haveli (1), Delhi (3), Gujarat (1), Himachal (2), Jammu & Kashmir (1), Manipur (3), Meghalaya (4), Mizoram (5), Nagaland (11), Pondicherry (1), Sikkim (3), Tripura (4), Uttar Pradesh (1), Uttarakhand (6) and West Bengal (18).

Heat Map 11: Loan amount (Rs Cr) disbursed during FY 2019-20

Heat Map 12: Average loan disbursed per account (Rs) during FY 2019-20

Section 5

Top States, Top Districts & DRI

Top ten states

As on 31 August 2019, the Top 10 states in terms of GLP, account for 82.8% of the universe GLP. The contribution of these states in terms of accounts and unique borrowers is also very significant as shown in the table below.

	GLP (Rs Cr)	Accounts (Cr)	Unique Borrowers (Cr)
Top 10 States (in GLP)	1,63,491	7.93	4.54
Universe	1,97,386	9.62	5.37
Contribution of Top 10	82.8%	82.4%	84.5%

The GLP of Top 10 states and average loan outstanding per account and per unique borrower is shown in the figure below. The **largest state is Tamil Nadu** with a GLP of Rs 28,934 Cr closely followed by **West Bengal** having a GLP of Rs 28,472 Cr.

The contribution of Top 10 states to universe PAR >30 is 84.6% and to PAR >90 is 83.9%. The Top 5 PAR contributing states are Madhya Pradesh, Maharashtra, Odisha, Kerala and Tamil Nadu and together they account for 65.5% of universe PAR >30 and 65.3% of PAR >90.

Top districts

As evident from the table below, while microfinance is present in 619 districts, the operations are concentrated in the Top 300 districts which contribute to more than 90% of the universe GLP. Microfinance services are being provided in 106 out of 115 aspirational districts and their contribution to the universe GLP is about 15%, though the depth of outreach is much lower than the Top 300 districts indicating good scope of expansion in these districts.

Districts	GLP (Rs Cr)	GLP (% of Univ.)	Unique Borrowers (Cr)	UB (% of Univ.)	Depth of outreach
Top 100	1,06,676	54.0%	2.76	51.5%	46.7%
Top 200	1,52,572	77.3%	4.10	76.5%	43.4%
Top 300	1,78,418	90.4%	4.93	91.9%	40.0%
Remaining 319	18,969	9.6%	0.64	11.9%	9.6%
Aspirational 106	29,877	15.1%	0.85	15.8%	30.8%
Universe	1,97,386		5.37		27.7%

The graph below compares the growth of portfolio in the Top 300 districts, remaining districts and aspirational districts, based on data on loans originated after February 2017. The CAGR GLP from Mar'17 to Aug'19 for 'ever' loans has been 33.1%, 36.7% and 43.0% respectively for Top 300, remaining and aspirational districts. It does indicate that the FIs have started exploring other districts apart from those where they already have a strong presence.

The PAR analysis of Top districts in comparison to remaining and aspirations districts is shown in the graph below. It is evident that that despite concentration of operations in Top 300 districts, the PAR levels are better in comparison to other remaining districts. PAR level of aspirational districts are comparatively better than the top districts. Fifty aspirational districts feature in Top 300.

District Risk Index

The DRI provides a consolidated view of district wise risk in microfinance operations. As explained in the note on page 4, DRI takes into account five risk factors to calculate the index– multiple loans, density of FIs, depth of outreach, indebtedness and portfolio quality as measured by PAR 60.

For analysis, the DRI has been classified into five categories based on combined risk scores of all parameters. These are

Very High: >75%

High: >=60% to 75%

Moderate: >=45% to <60%

Low: >=25% to <45%

Very Low: <25%

The table below shows the number of districts in various DRI categories. Districts with very high and high DRI are 26.5% of the 619 districts where microfinance operations are present. Districts with moderate DRI are around 42.3% of the total and 31.2% have low and very low DRI. It is also evident that not every large district in terms of GLP feature in Very High or High risk category. However, none of them feature in the very low risk category.

Heat Map 13 on the next page depicts the district wise DRI. The major states with large number of districts featuring in Very High and High risk categories are as below

- Very High: Odisha (12) and Tamil Nadu (4)
- High: Madhya Pradesh (27), Bihar (17), Odisha (16), Karnataka (16), Assam (14), Tamil Nadu (9), Jharkhand (8), Chhattisgarh (7), Rajasthan (5), Uttar Pradesh (5), Tripura (4), Haryana (4), Kerala (4), West Bengal (3) and Maharashtra (3)

DRI	No. of districts	% of Universe GLP	Of which in Top 100	Of which in Top 200	Of which in Top 300
Very High	20	5.0%	5	12	16
High	144	31.3%	30	73	110
Moderate	262	55.9%	59	102	157
Low	136	7.4%	6	13	17
Very Low	57	0.3%	0	0	0

Heat Map 13: District Risk Index

Case Study: Odisha

Odisha – State Profile

Odisha lies in the eastern region of India and shares in boundaries with Jharkhand to its north, Andhra Pradesh to the south, Chhattisgarh to the west, West Bengal to the north-east and is bound by Bay of Bengal to its east with a coastline of 480 Km. Administratively, Odisha divided into 30 districts, 317 *tehsils* and 6,798 *gram-panchayats*. Odisha is one of the larger states in India and ranks 9th in terms of area and 11th in terms of population among the 28 states and 9 union territories.

The economic growth in Odisha has also seen good progress and its ranking on per capita income has improved from 25th in 1996-97 to 16th in 2016-17. Agriculture remains the primary source of livelihood with 46% of workers employed in the agriculture sector ¹. The state contributed around 2.5% of the GDP of India during 2017-18 ².

In microfinance, as on **31 August 2019** the total GLP of Odisha was **Rs 11,591 Cr** with around **0.35 Cr unique borrowers** through **0.67 Cr accounts**. The table below summarizes the progress in Odisha in comparison to India in the last two financial years.

<i>Financial Year As on</i>	2018-19 31 Mar 19		2019-20 31 Aug 19	
Microfinance profile	Odisha	India	Odisha	India
Population (Cr)	4.62	133.74	4.64	134.41
No. of households (Cr)	1.06	27.55	1.07	27.69
No. of active FIs	48	149	47	163
Districts with microcredit business	30	626	30	627
Average FIs per district	37	30	36	31
Unique number of borrowers (Cr)	NA	NA	0.35	5.37
Total micro loan accounts (Cr)	0.65	8.66	0.67	9.62
Portfolio outstanding (Rs Cr)	11,486	1,79,314	11,591	1,97,386
Portfolio outstanding per account (Rs)	17,766	20,702	17,278	20,514
Loan accounts disbursed (Cr)	0.45	6.31	0.16	2.70
Loan amount disbursed (Rs Cr)	12,661	1,98,992	4,931	89,214
Loan disbursed per account (Rs)	28,115	31,520	29,970	33,090
GSDP/GDP (Rs Cr at current prices, base year 2011-12)	4,85,376	1,90,10,164	5,08,009	2,00,48,045

Note:

- All data as on date for respective FYs, except disbursement which is for a period from Apr'18 to Mar'19 for FY 2018-19 and from Apr'19 to Aug'19 for FY 2019-20.
- Information on unique microfinance borrowers is not available for Mar'19.
- The Gross State Domestic Product (GSDP) for Odisha and Gross Domestic Product (GDP) for India has been extrapolated for Aug'19 based on the CAGR from base year of 2011-12 to 2018-19. (Source: <http://mospi.nic.in/data>)

As broadly evident, microfinance operations in Odisha seems more concentrated with higher average MFIs per district, though it has favorable numbers with respect to portfolio outstanding per account as well as loan amount disbursed per account. An analysis of the key ratios on the next page provides a better sense of the status of the state.

¹ 2019, June, "Odisha Economic Survey 2018-19". Planning and Convergence Department, Directorate of Economics and Statistics, Government of Odisha

² 2019, August. "Gross State Domestic Product at Current Prices, Base Year 2011-12". Directorate of Economics & Statistics of respective State Governments

Performance snapshot of Odisha as on 31 August 2019

Base month: 31 March 2017 (FY 2016-17) for CAGR calculations

- **Total GLP** of Odisha stands at **Rs 11,591 Cr** which is 5.9% of the industry GLP of Rs 1,97,386 Cr. The ever GLP has grown by a CAGR of 42.1% since March 2017 which is relatively higher than the CAGR of the universe of 33.4%.
- Total **active accounts** are around **67.1 Lk**, with Odisha accounting for 7.0% of universe 9.62 Cr accounts. Similarly, the CAGR of ever accounts in Odisha has been 29.9% in comparison to 21.9% nationally.
- These loans are with **35.1 Lk unique borrowers** which are about 6.5% of the universe unique borrowers of 5.37 Cr.
- This translates into **1.91 accounts per unique borrower in Odisha** which is higher than the industry average of 1.79.
- During the FY 2019-20 (April to August 2019), **16.5 Lk loans** worth **Rs 4,931 Cr** were **disbursed in Odisha**. These were 6.1% of 269.6 Lk universe loans and 5.5% of the Rs 89,214 Cr loan amount disbursed in India in the same period.
- The average loan size for disbursements in Odisha during Apr-Aug'19 of Rs 29,970 has reasonably grown at a CAGR of 9% since Mar'17 (Rs 24,331). It also compares well the industry average loan size of Rs 33,090 for Apr-Aug'19 with a CAGR of 6.7% since Mar'17.
- Average number of **FIs active per district is 36** (max 47 and min 20). At the industry level, the average FIs per district is 31 while 163 unique entities are active in microfinance space.
- As on 31 August 2019, **PAR30 (6.0%), PAR60 (4.9%), PAR90 (4.2%)** and **PAR180 (2.9%)** of Odisha has significantly increased from Mar'18 levels – 0.4%, 0.3%, 0.2% and 0.1% respectively. It was 0% as of Mar'17, since analysis is based on portfolio originated after Feb'17.
- The PAR in Odisha is also much higher in comparison to Industry figures of 2.1%, 1.8%, 1.6% and 1.2% for PAR 30, 60, 90 and 180 respectively as on 31 August 2019.
- Considering GDDP as a proxy for per capita income, the ratio of **GLP/capita to GDDP/ capita** was **30.1%** for Aug'19 which is higher than that of the universe at 24.7%. A higher GLP/GDDP ratio signifies a higher probability of indebtedness.
- The **depth of outreach in Odisha at 47.1%** is also much higher than that of the universe at 27.7% indicating a relatively higher saturation.

Key risk ratios (for DRI)	31 Aug 19	
	Odisha	India
Multiple loans: Accounts per unique borrower	1.91	1.79
Density of FIs: '000 potential HHs per FI	159	1,189
Depth of outreach: Unique borrowers to potential HHs	47.1%	27.7%
Indebtedness proxy: per capita GLP to per capita GSDP	30.1%	24.7%
Portfolio quality: PAR >60 days	4.91%	1.79%

Trends: Outreach and GLP

Trends: Disbursements and PAR

Heat Map: Multiple loans - Accounts per unique borrower

- Multiple loans signify number of accounts per unique borrower and the higher the ratio the greater the risk. The borrower has to manage multiple repayments in a month which can lead to the risk of using a loan from one MFI to repay another and risk of over-indebtedness.
- 21 districts in Odisha have more than the country benchmark of 1.79 accounts per unique borrower and 3 districts have it more than 2.00 .

Note: The map shows district-wise number of accounts per unique borrower

Heat Map: Density of FIs - '000 potential HHs per FI

- The density of FIs shows how many thousand potential HHs are reached by each FI. The lower the ratio that higher the risk which means higher number of FIs are competing for the same base population. A branch generally reaches a saturation level at around 3,000 to 3,500 clients. Q1 2018-19 Micrometer shows that the average number of clients per branch is 2,240.
- Therefore density of FIs >3,000 potential HSs per MFIs indicates scope for expansion and below that a risk.
- In Odisha, 1 districts have density of FIs <=3,000 HH while 15 districts have it <=6,000 HHs.

Note: The map shows district-wise average outreach of each FI in thousand households

Heat Map: Depth of outreach - unique borrowers/potential HHs

- Depth of outreach ratio indicates the level of saturation in a district in terms of proportion of potential HHs reached by microfinance. The higher the ratio the greater the risk of targeting the same client multiple times leading to multiple lending, over indebtedness etc.
- In Odisha 23 districts have a depth of outreach >35% and 13 districts have it >50%. The India benchmark is 27.7% which shows the microfinance still has to reach 3/4th of potential households in the country.

Note: The map shows district-wise number of unique clients in '000s

Heat Map: Risk of indebtedness - GDP/GDDP ratio (per capita)

- The GDP/GDDP (per capita) of 30.1% at the state level appears reasonable considering net disposable income of 40%, 50% to 60% of which can be factored for loan instalment. At national level, the GDP/GDDP ratio is 24.7%.
- As of Aug'19, **24 out of 30 districts** in Odisha have the **GLP/GDDP ratio of >24.7%**, 11 districts has this ratio >40% and 6 districts >50%, which means that these districts carry a high risk of over indebtedness.

Note: The map shows district-wise ratio of GLP to GDDP per capita in percentage and GLP (Rs. Cr)

Heat Map: Portfolio quality - PAR >60 days

- PAR >60 days as of Aug'19 for the microfinance universe is 1.8% while of Odisha is 4.9% which is significantly higher. Some of it can be attributed to the cyclone Fani which struck Odisha on 5 May 2019, but even for the period before it PAR in Odisha has been rising faster than the universe (as shown in the trends sheet).
- 22 districts of Odisha have PAR >60 of >2% while 10 districts have it >5%. This includes some of the districts like Balangir, Bargarh, Boudh, Kalahandi, Koraput, Nabarangapur, Sambalpur and Sonapur that were not that affected by Fani.

Note: The map shows district-wise level of PAR >60 in percentage

District Risk Index (DRI) of Odisha

- Based on the categorization of DRI, 93.3% of districts of Odisha are in the very high risk or high high risk zone. None of the districts fall low or very low categories.
- 12 districts of Odisha are in the Top 16 districts in terms of Index% though just one of them feature in Top 100 districts in terms of GLP rank.
- The contribution of portfolio of very high risk districts to Odisha GLP is 37%.

DRI	31 Aug 19	
	Odisha	India
Very high	40.0%	3.2%
High	53.3%	23.0%
Moderate	6.7%	41.9%
Low	0.0%	21.7%
Very low	0.0%	9.1%

- The table below provides the district wise analysis of key risk ratios and the DRI. When compared with the rank of GLP of Odisha districts (out of 619) it is evident that only 8 are in the Top 100 districts and none in Top 10. The highest ranked district is Ganjam with a GLP of Rs 1,283 Cr (Rank 23), followed by Khorda with GLP of Rs 1,040 Cr (Rank 43) and Cuttack with GLP of Rs 964 Cr (Rank 50). District wise data is provided in the **Annexure**.

District	Multiple loans	Density of Fls	Depth of outreach	GLP/GDDP (Per Capita)	PAR >60	DRI	DRI Category	GLP Rank	CRISIL Inclusix
