Preface & Acknowledgements

This is the **second edition** of MFIN's new publication – **MicroMirror**. This publication provides an overview of the **Microfinance Universe**, including all types of lenders in the microfinance space like Banks, NBFC-MFIs, SFBs, NBFCs and others (nonprofit institutions). The report analyses the district level outreach and progress of the "Universe" with the intention to provide the required intelligence to MFIN Members and Associates to manage their district level presence in a more informed manner.

The analysis is based on **loans originated after February 2017**. This has been done to reflect the current position of the microfinance industry, by excluding the legacy accounts/portfolio resulting from the AP crisis as well as demonetization. The data is **sourced from Equifax** and we are thankful for their continued support for MFIN publications.

The report is structured into seven broad sections as below

- **Snapshot of the Microfinance Industry:** Provides "at a glance" infographic view of the microfinance industry **as on date** in terms of its size, outreach (geographical as well as operational).
- **Section 1 - The Microfinance Players:** Displays the numbers of various types of microfinance players and the extent of their geographical presence. The district level presence of institutions is depicted in a heat map.
- **Section 2 - Outreach Analysis:** Analyses the reach of the industry in terms of geographical spread (state & districts including aspirational districts with microfinance presence) and depth (proportion of potential population served).
- **Section 3 - Portfolio Analysis:** Examines the health of the portfolio, tracked down to the district level. The heat maps on PAR >30, >60, >90 and >180 days will be able to clearly depict the red flags and therefore the corrective action that the players need to take. The section also analyses the trends of portfolio growth and health.
- **Section 4 - Disbursement Analysis:** Presents the disbursements (in terms of no. of loan accounts and amount disbursed) during a completed financial year or quarter. Comparison with the corresponding period for the last financial year/quarter is also depicted to provide an understanding of the trends.
- **Section 5 - Top 10 States, Top Districts and DRI:** Illustrates the top states and districts (including aspirational districts) and analyses their contribution to the universe in terms of gross loan portfolio (GLP), outreach (accounts and unique borrowers) and portfolio quality.

The report also includes an indicator developed by "MFIN Information Hub", termed as **District Risk Index (DRI)** – the explanation of this index is provided in the next page. Readers may contact the Information Hub team for any clarifications regarding this report.

Swetan Sagar, Head – Advocacy & Development
Amit Mathur, Vice President – Advocacy and Development
Rajkumar Chauhan, Manager - Information Hub

District Risk Index

District Risk Index (DRI) has been created to provide a **comprehensive picture** of risk profile of a district at a point in time. **Five parameters** have been chosen that **indicate riskiness** of microfinance operations and for which basic data is available for analysis. These parameters point towards situations that can lead to multiple loans, over-indebtedness, concentration etc. and which have in the past (and at present as well) led to crisis events. The following are the parameters

1) Multiple loans: Accounts per unique borrower

The ratio of number of accounts per unique borrower indicates the risk of multiple loans. The higher the number of loans with a borrower, the greater is the risk of getting into a debt trap. It is also difficult to manage multiple loans, as a borrower then has to attend higher number of group meetings per week/month.

2) Density of FIs: '000 potential HHs per FI

This ratio analyses number of potential households served per financial institution (FI) in a district. The lower the ratio the greater the risk and it would mean that multiple FIs are targeting common households leading to unhealthy competition.

3) Depth of outreach: Unique borrowers to potential HHs

This ratio points towards saturation level in a district. Potential households are assumed to be 70% of the total households in a district (as per census and extrapolated by a growth rate of 1.2% p.a. to the current month), with the bottom 15% and the top 15% households in terms of economic wellbeing excluded.

4) Likely indebtedness: per capita GLP to per capita GDDP

Per capita income is generally skewed by the top 15-20% of the income class who are not microfinance clients. Average loan outstanding to per capita GNI ratio of around 20-25% indicates that low income households are targeted, and this ratio is commonly used by multilateral agencies to explain targeting. In this context, if low income households are targeted but if per capita GLP/GNI is >30% it could mean risk of over indebtedness. Since district level GNI data is not available, Gross District Domestic Product (GDDP) has been used as a proxy for analysis.

5) Portfolio quality: PAR > 60 days

PAR > 60 days has been considered as the most suitable indicator for measuring the quality/health of the portfolio – it has neither become an NPA where risk of loss is very high, nor it takes the actual delinquency numbers (PAR > 0 days) which could be due to delayed repayment and therefore probability of recovery is better.

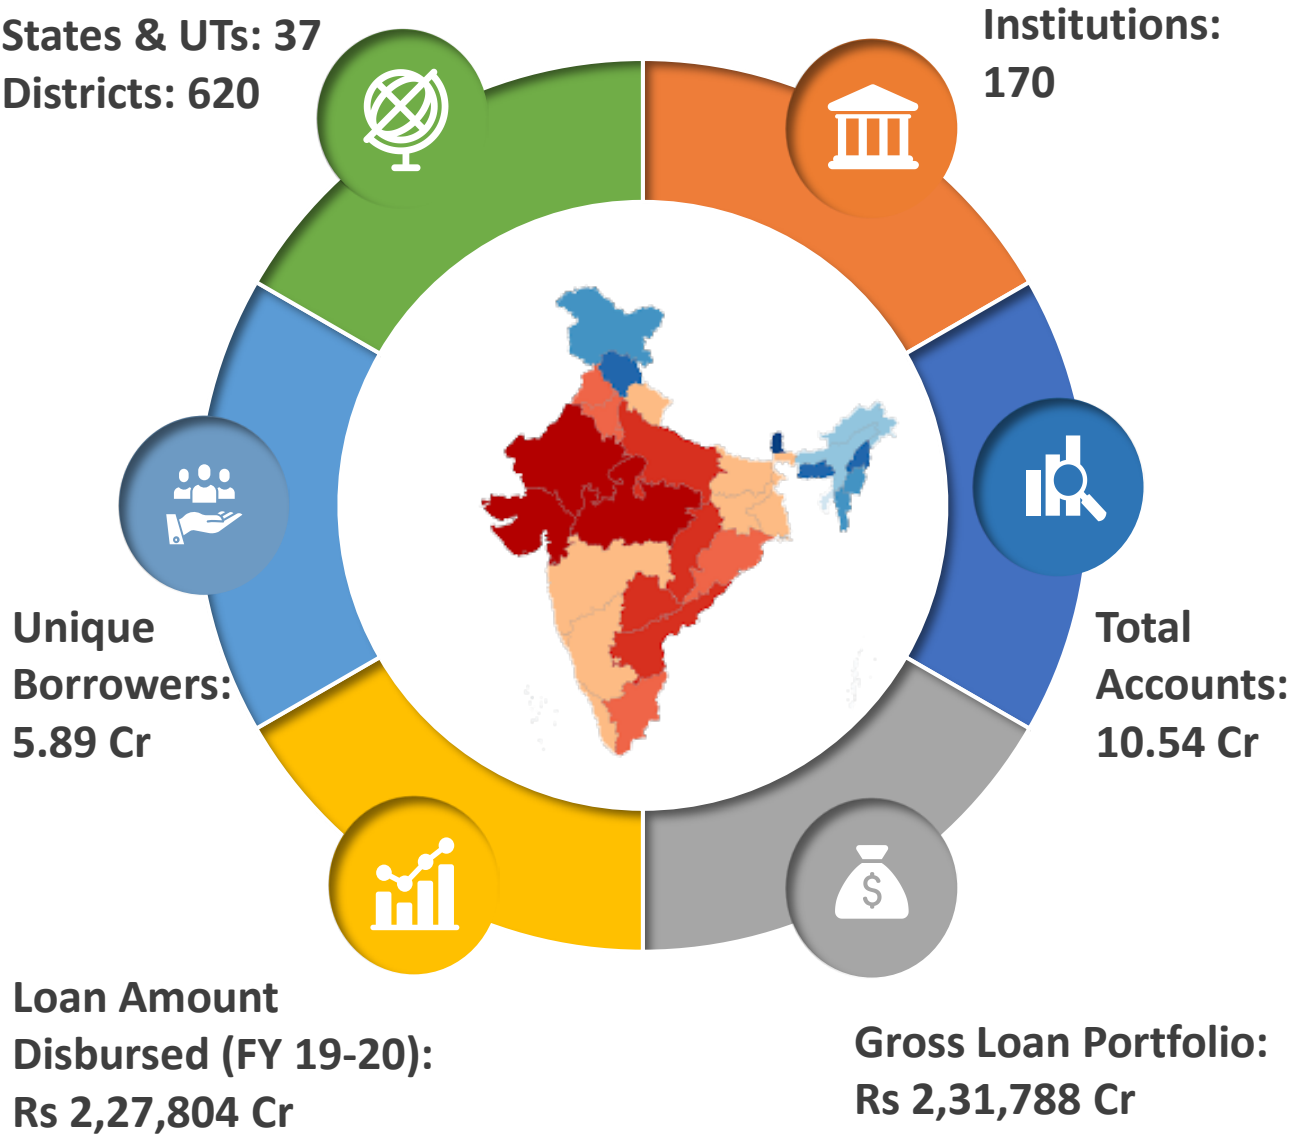

Each parameter individually does not provide an idea on extent of riskiness. Therefore, DRI is calculated by overlaying these five risk parameters to provide the risk profile of each district with microfinance portfolio.

- Percentile method used to assign district wise score for each parameter
- Weightage have been assigned to each parameter based on perceived degree of riskiness: 15% each to Account/Unique Borrowers & Density of FIs, 20% to Depth of Outreach (Unique/HH) and 25% each to Portfolio/GDDP (Per Capita) and PAR >60 days.
- Weighted average of the five parameters provides the Risk Index of a district

DRI is meant to provide the required intelligence for taking an informed decision by members for managing their presence in a district. State/District wise DRI is presented in the **Annexes 1 and 2**.

Snapshot of the Microfinance Industry

Section 1

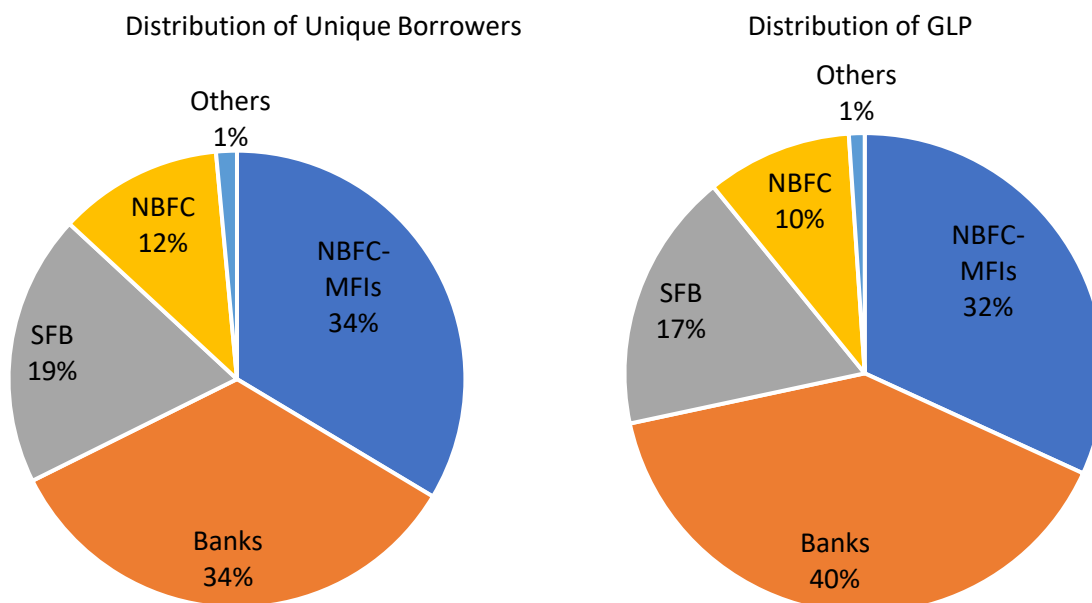

The Microfinance Players

Financial institutions offering microfinance

As shown in the table below, the different types of financial institutions active in the microfinance space includes NBFC-MFIs, Banks, SFBs, NBFCs and others (mainly nonprofit institutions). As on **31st March 2020**, 170 institutions were offering microfinance services across 620 districts in 37 states and union territories, with a total GLP of Rs 2,31,788 Cr with 5.89 Cr unique borrowers through 10.54 Cr accounts.

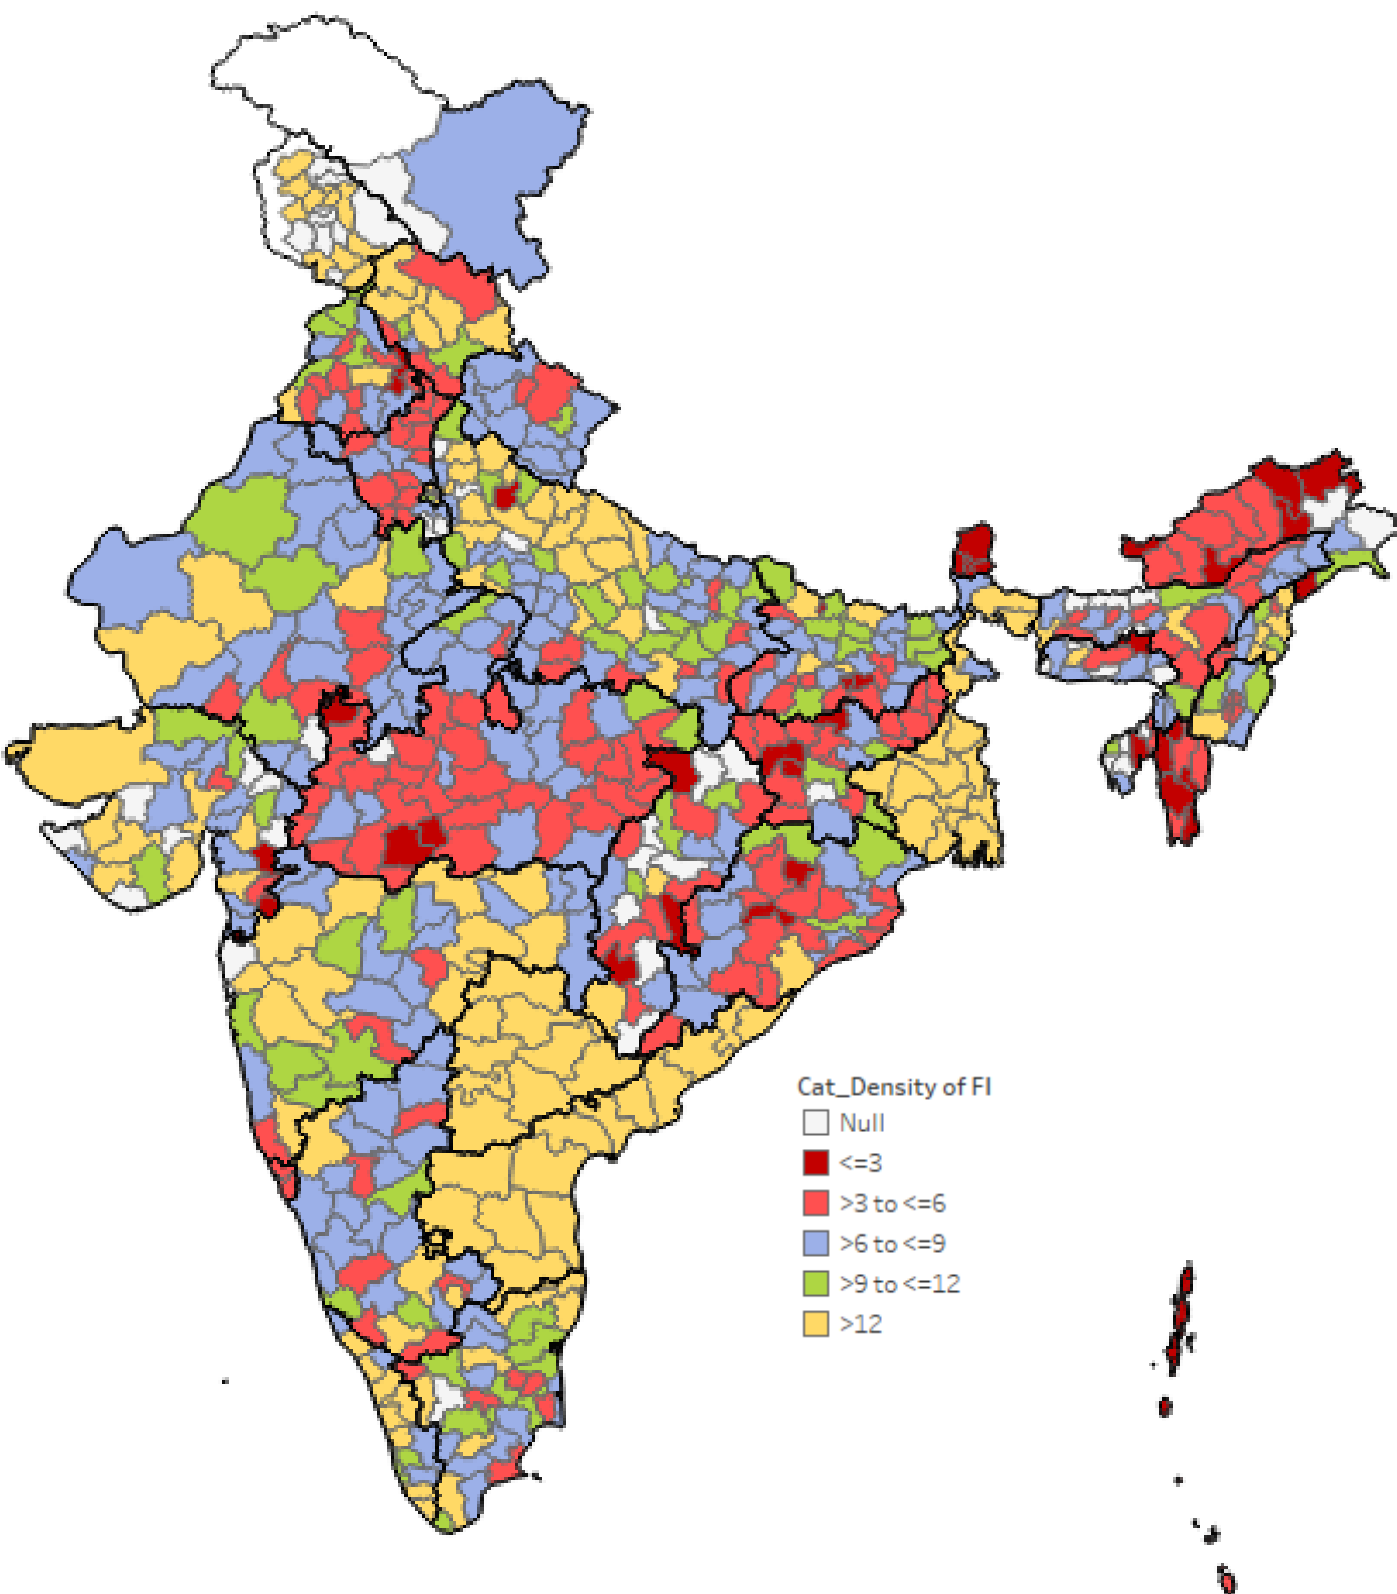

Entity Type	No. of institutions	No. of states where active	No. of districts where active
NBFC-MFI	84	36	600
Bank	12	37	619
SFB	8	35	597
NBFC	45	29	523
Others	21	25	396
Universe	170	37	620

Banks are the largest player in the microfinance segment with contribution of 40% in terms of GLP and 34% of unique borrowers. NBFC-MFIs, which used to be the most significant player contribute 32% in terms of GLP and 34% of unique borrowers. They are followed by SFBs, NBFCs and others in that sequence.

The average number of active FIs per district is 33. The **Heat Map 1** on the next page depicts the number of households (in '000s) served per FI for each district and provides an idea on "Density of FIs" which is one of the risk parameters for DRI. At an all India level, the density of FIs is 1,148 which means that for every 1,148 thousand potential household there is an active financial institution.

Heat Map 1: FIs presence at district level ('000 HHs per FI) – **DRI parameter**

As evident from the map, central India (parts of Madhya Pradesh and Jharkhand) and parts of east and north east India have higher density of FIs ('000 potential HHs per FI). However, a higher density of FIs shown in North East may be due to low/scattered population as well.

Section 2

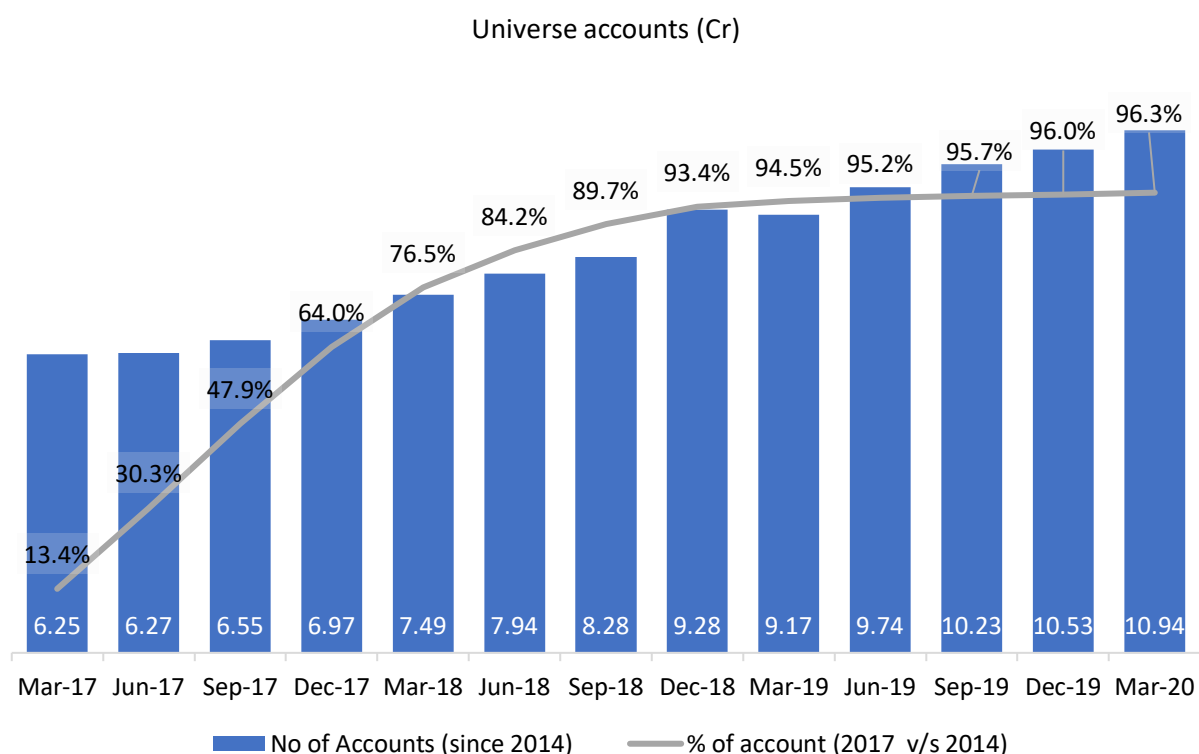

Outreach Analysis

Client coverage

As on 31st March 2020, the microfinance industry has attained an outreach of 5.89 Cr unique borrowers through 10.54 Cr accounts. This translates into 1.79 accounts per unique borrower. The **Heat Map 2** on the next page illustrates the district wise ratio of accounts per borrower.

	31 Mar 17	31 Mar 18	31 Mar 19	31 Mar 20
Loan accounts (Cr)	0.84	5.73	8.66	10.54
Unique borrowers (Cr)	0.75	3.53	4.94	5.89
Ratio (accounts/borrower)	1.12	1.62	1.75	1.79

The number of (ever) loan accounts have grown by a CAGR of 20.51% since March 2017. The loan accounts created based on loans originated after February 2017 is now 96.3% of ever accounts as shown in the graph below. District wise spread of number of accounts is shown in **Heat Map 3**.

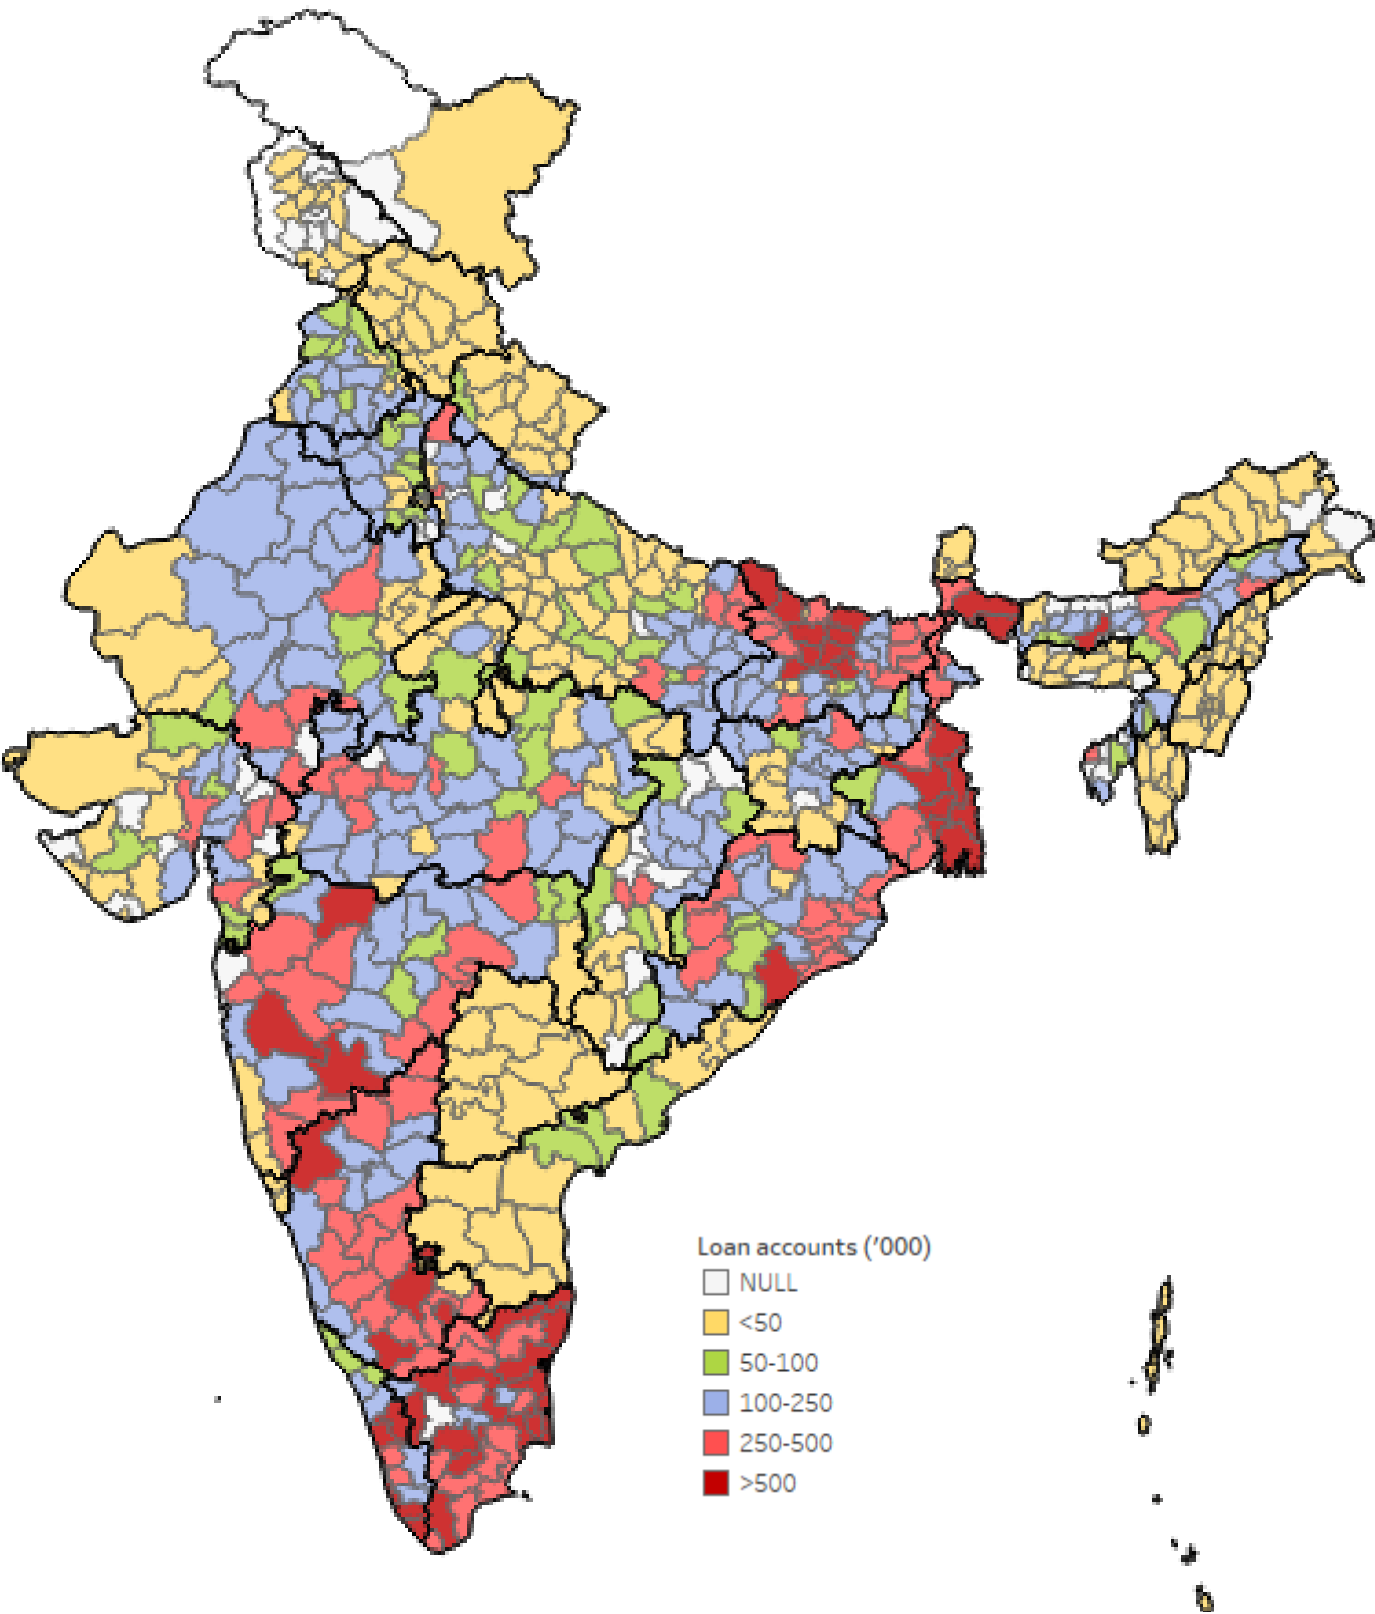

Depth of outreach indicates the proportion of potential households reached by microfinance. The universe depth of outreach is 30.18% which means that there is significant scope for the microfinance players to grow and expand. The district wise depth of outreach is presented in **Heat Map 4** and the depth of outreach in Aspirational Districts is separately shown in **Heat Map 5**.

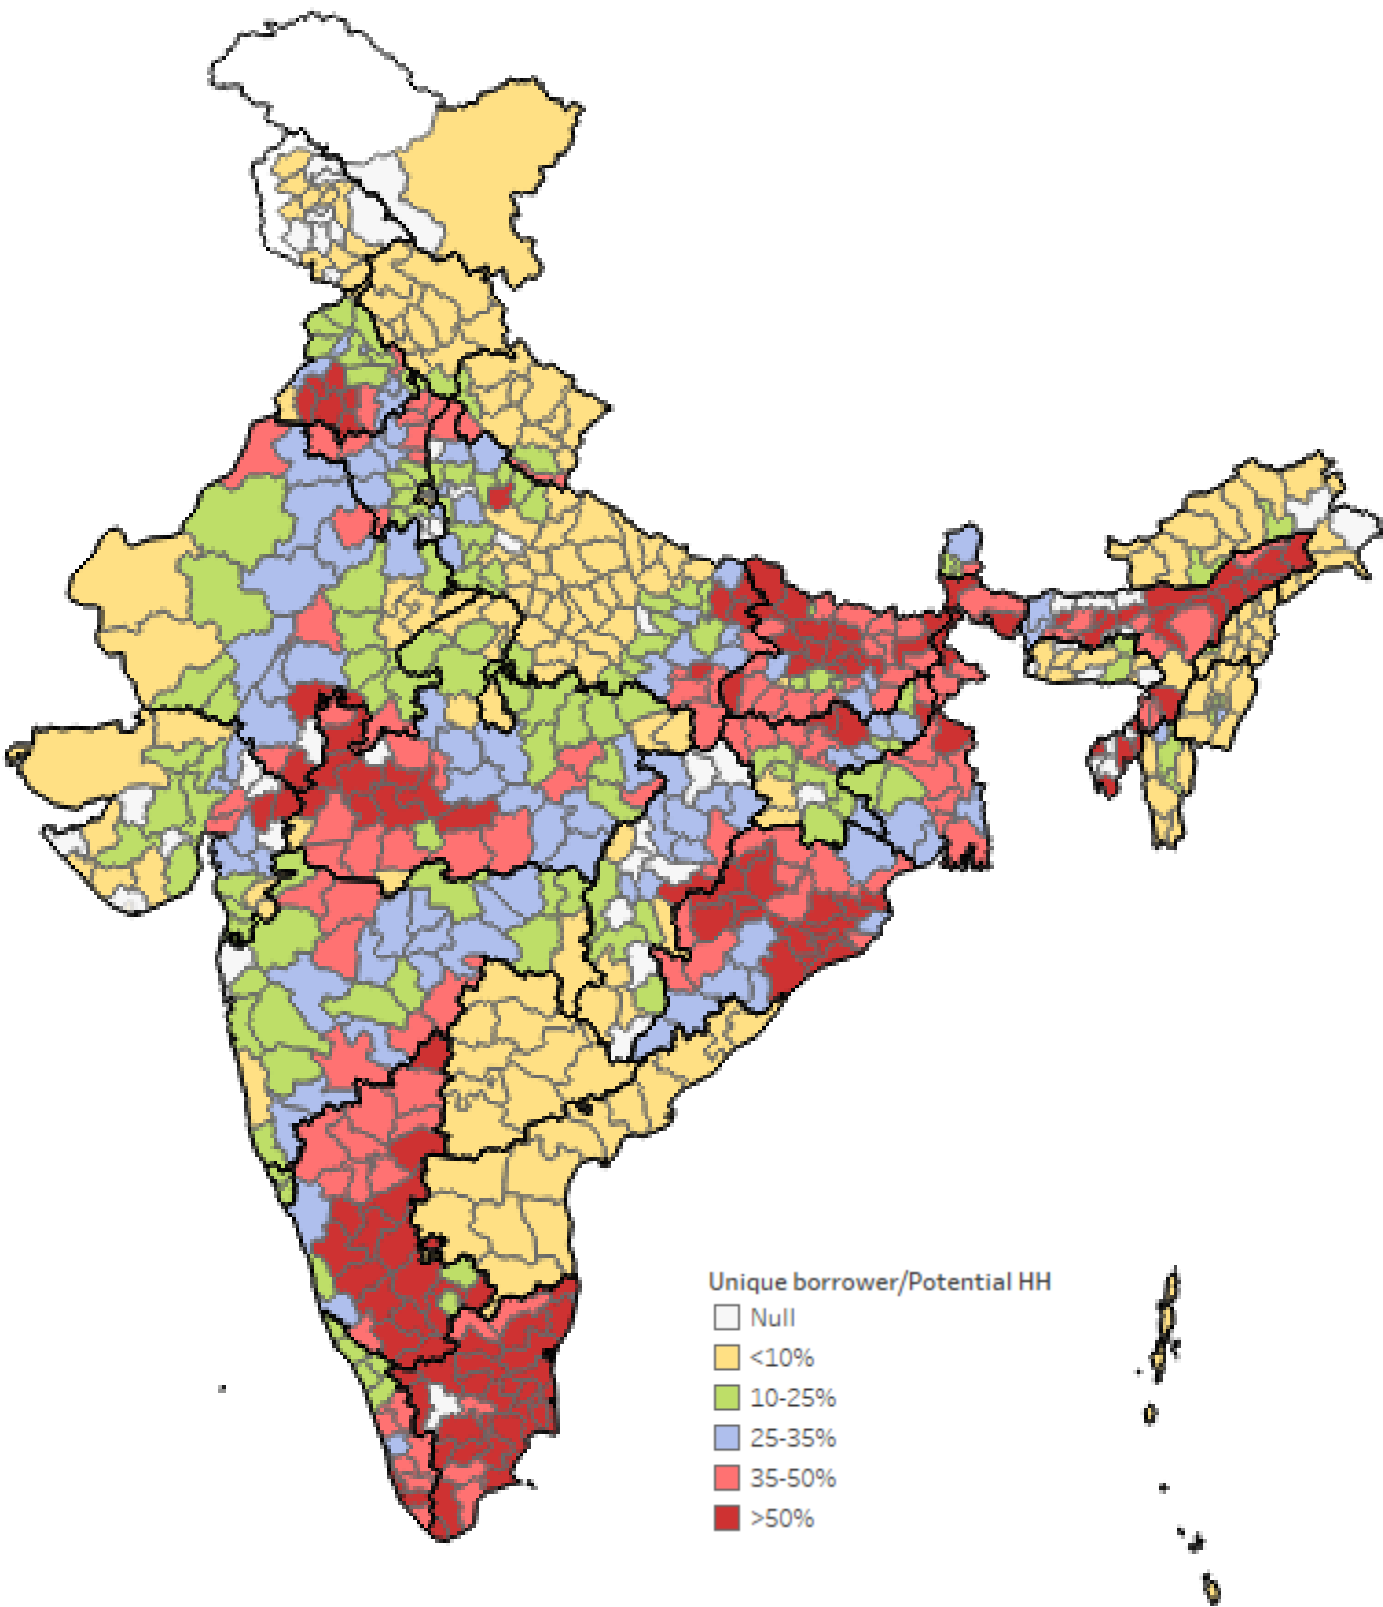

Heat Map 2: Multiple loans (accounts per unique borrowers) – **DRI parameter**

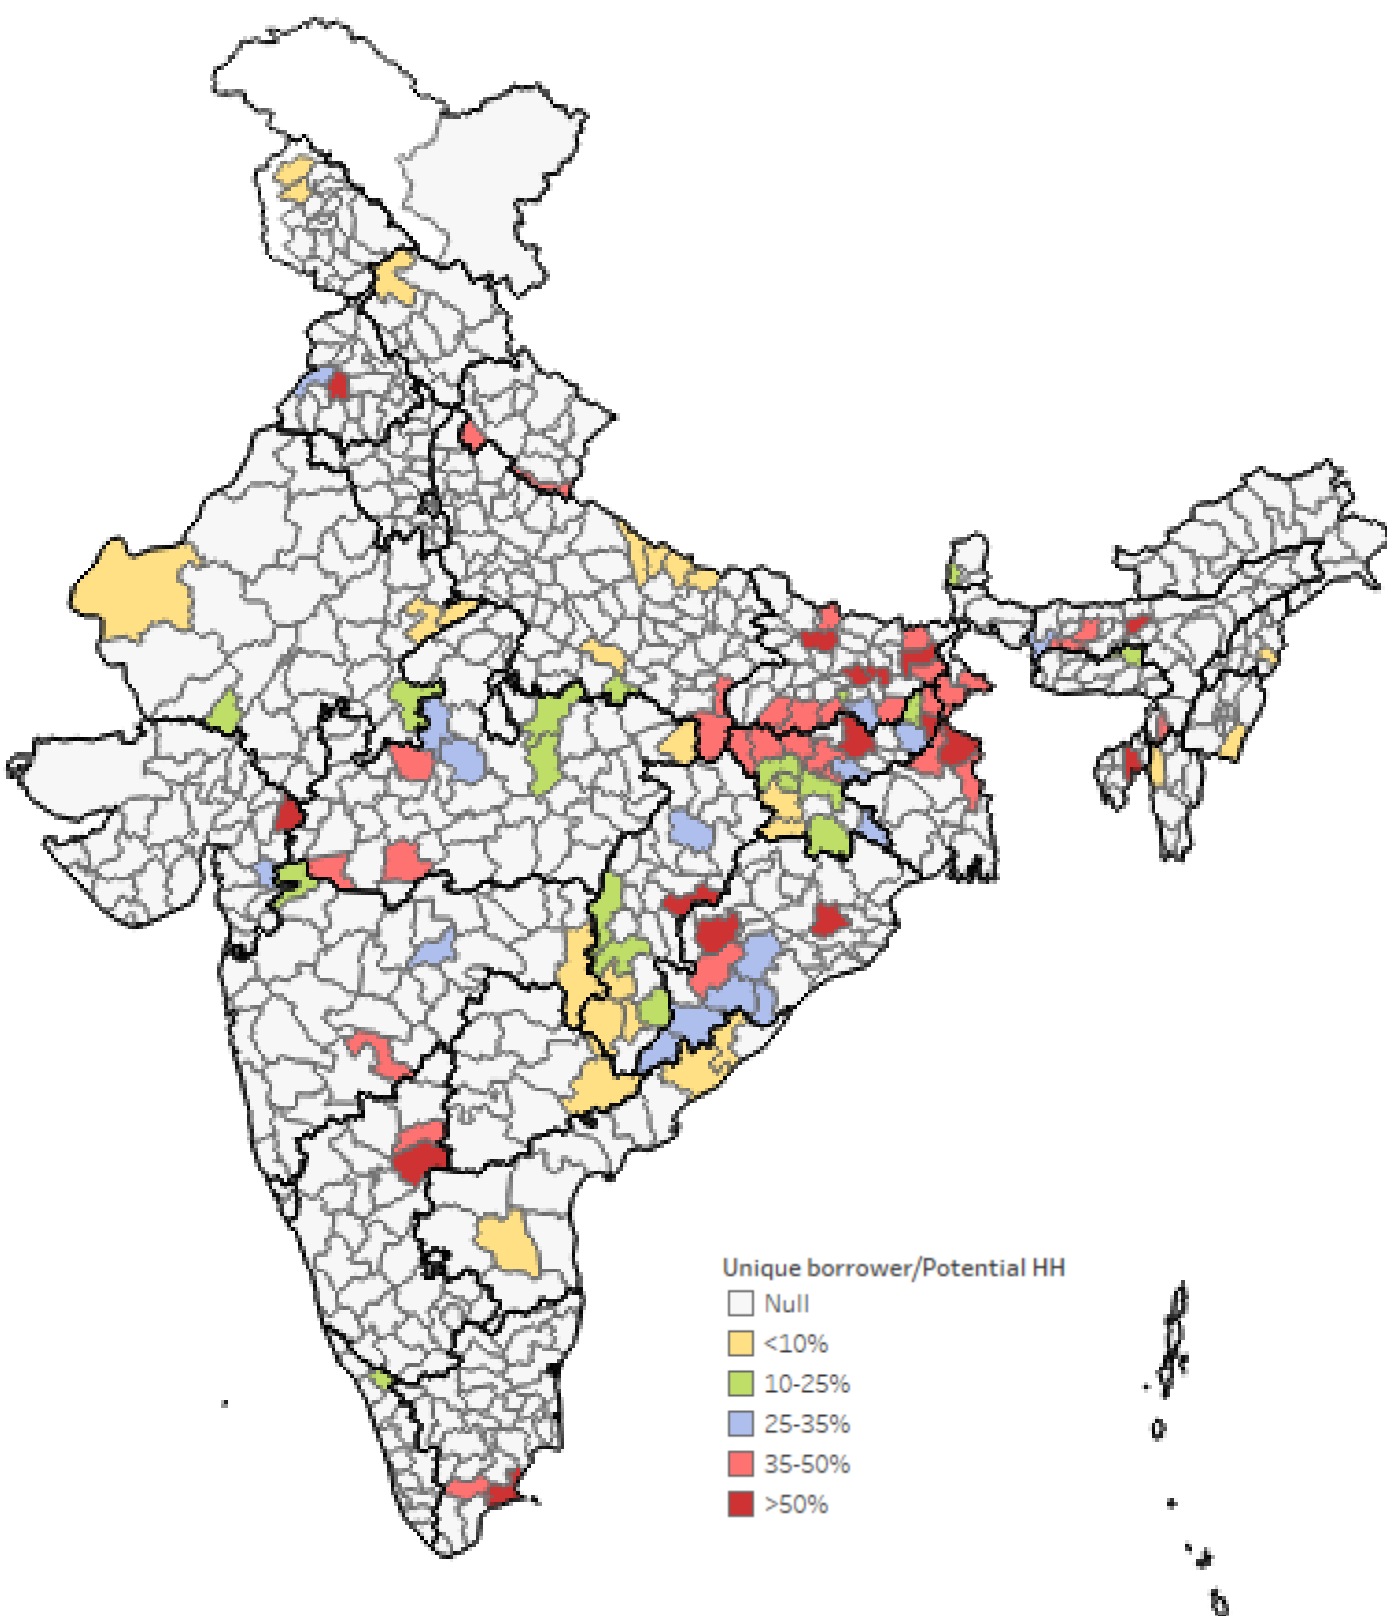

Heat Map 3: District wise loan accounts ('000)

Heat Map 4: Depth of outreach (% of potential HHs reached) – [DRI parameter](#)

Heat Map 5: Depth of outreach in Aspirational districts

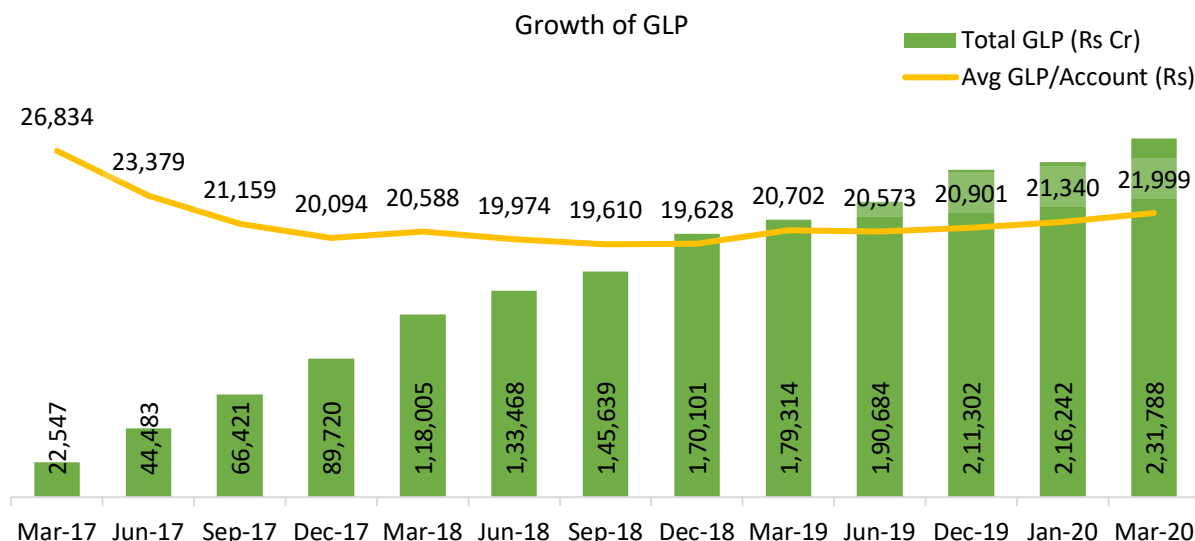

Section 3

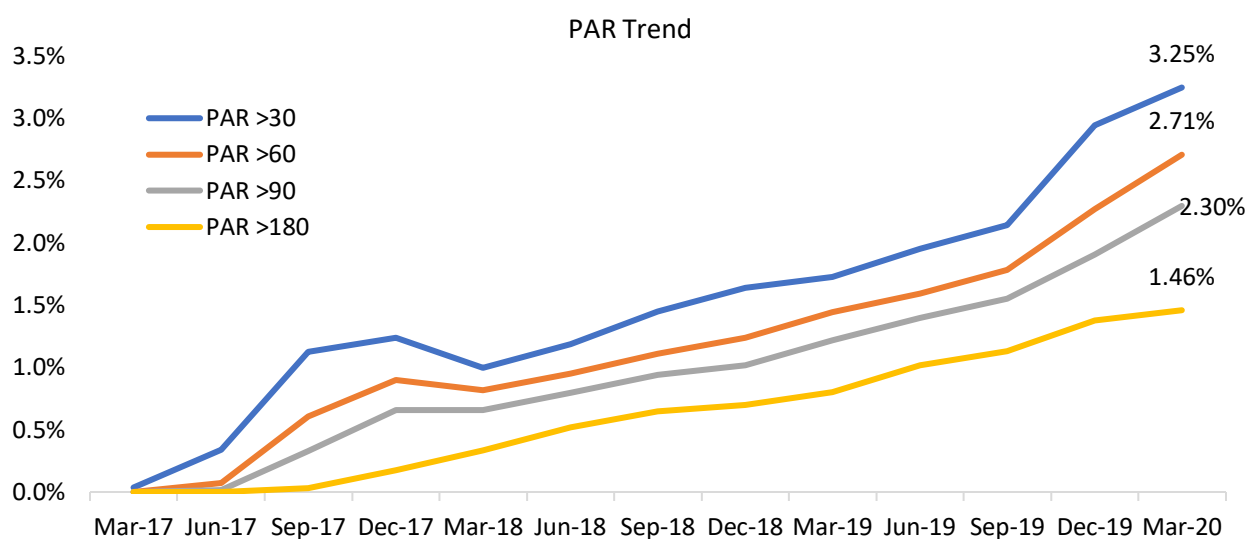

Portfolio Analysis

Portfolio growth and PAR trend

The industry GLP as on 31st March 2020 has reached Rs 2,31,788 Cr, of loans originated after February 2017 – district wise GLP is shown in **Heat Map 6**. This is now 97.5% of the ever GLP which grew by a CAGR of 32.8% since March 2017. The average portfolio per account is Rs 21,999 and per unique borrower is Rs 39,343. The graph below shows the growth of GLP since Mar'17. District wise average loan outstanding per account and per unique borrower is presented in **Heat Maps 7 and 8**.

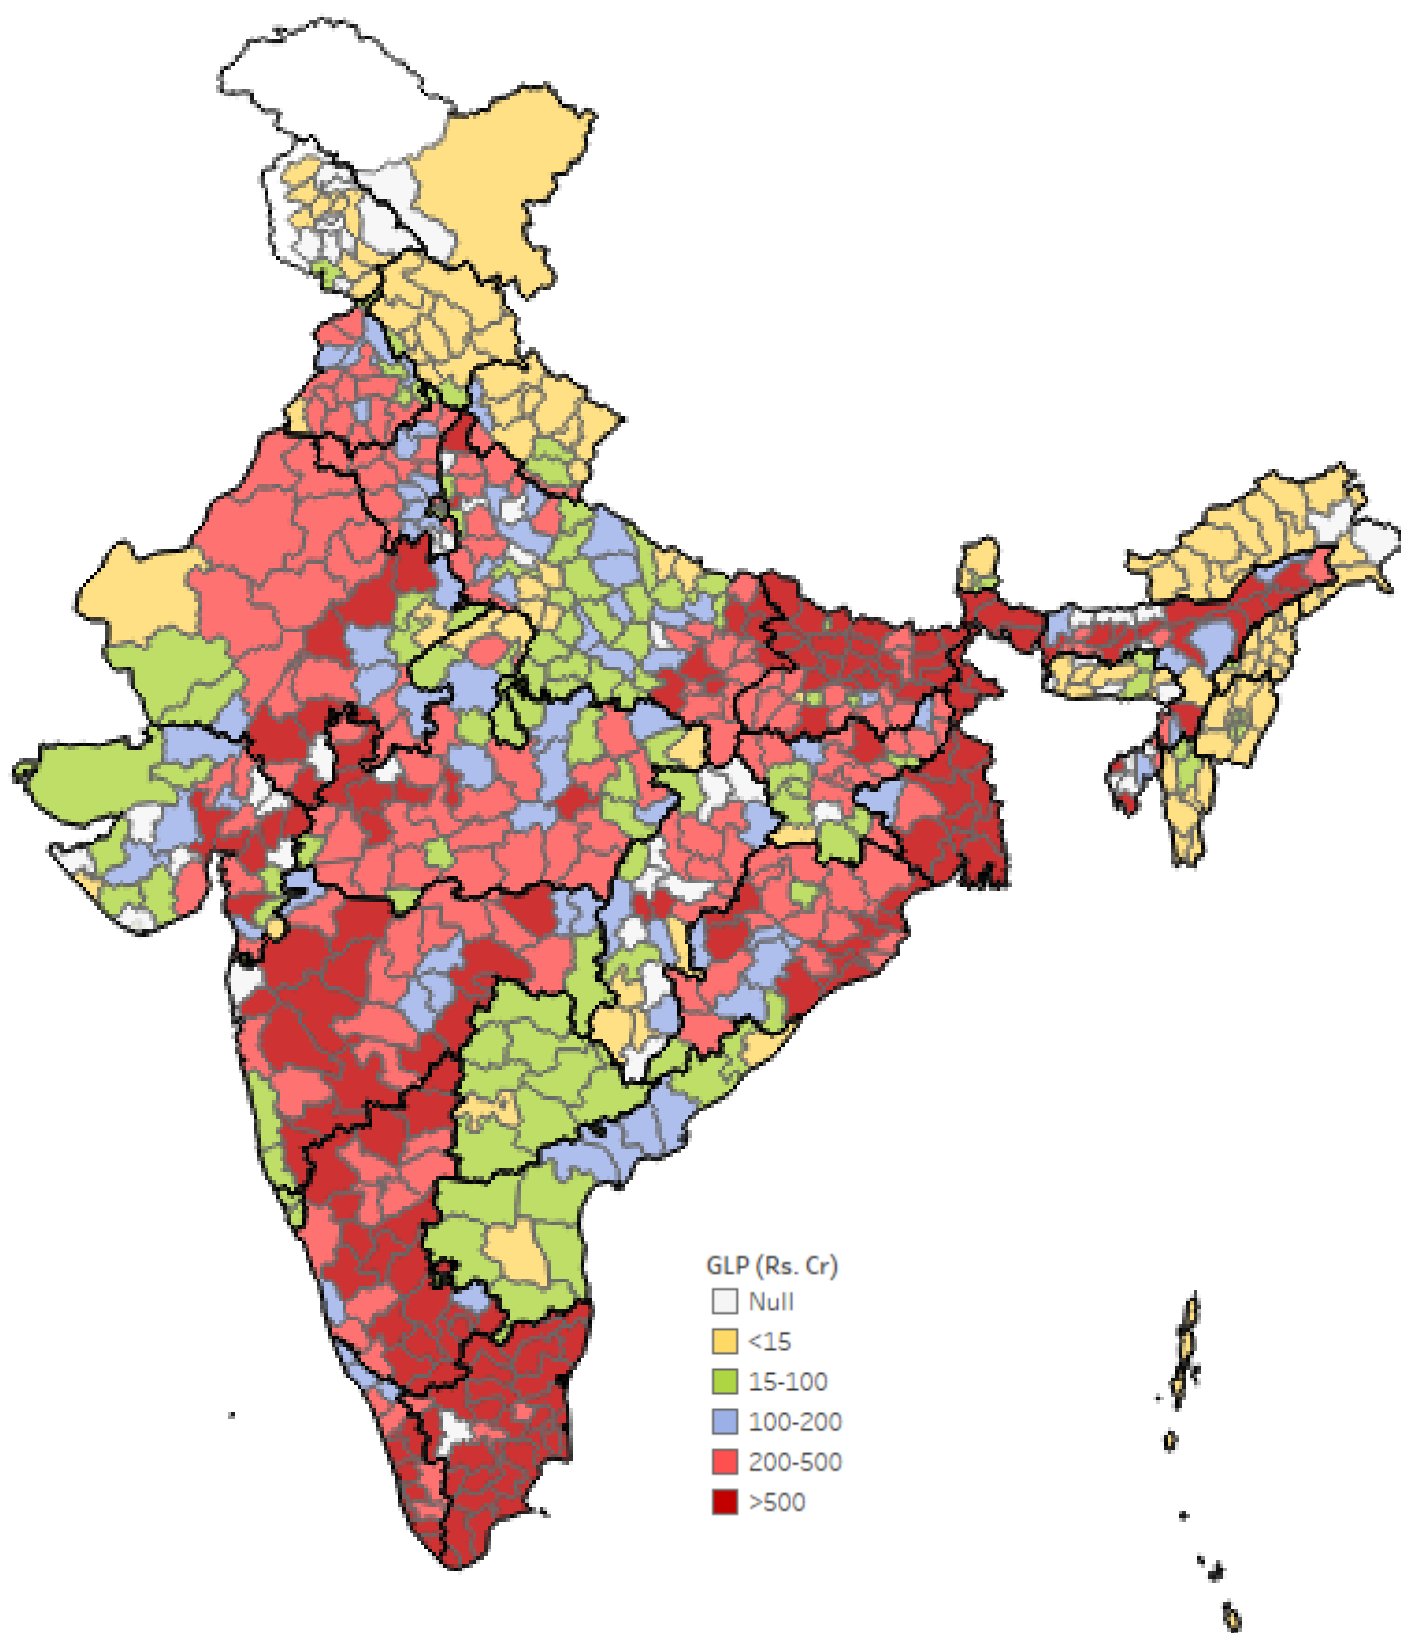

The increasing trend of PAR >30 for loans originated after February 17 has become steeper over the last three months, which could be attributed to the challenges in Assam, Odisha, Karnataka and Kerala. As of 31 March 2020, PAR >30 is 3.25% while the NPA as depicted by PAR >90 days is 2.30%, which has been historically below 1% and should be a cause of concern for the industry. The graph below shows the PAR trend and the **Heat Map 9** displays the district wise PAR >60 which is one of the risk parameters for DRI. **State and district wise** details are in **Annex 1 and 2**.

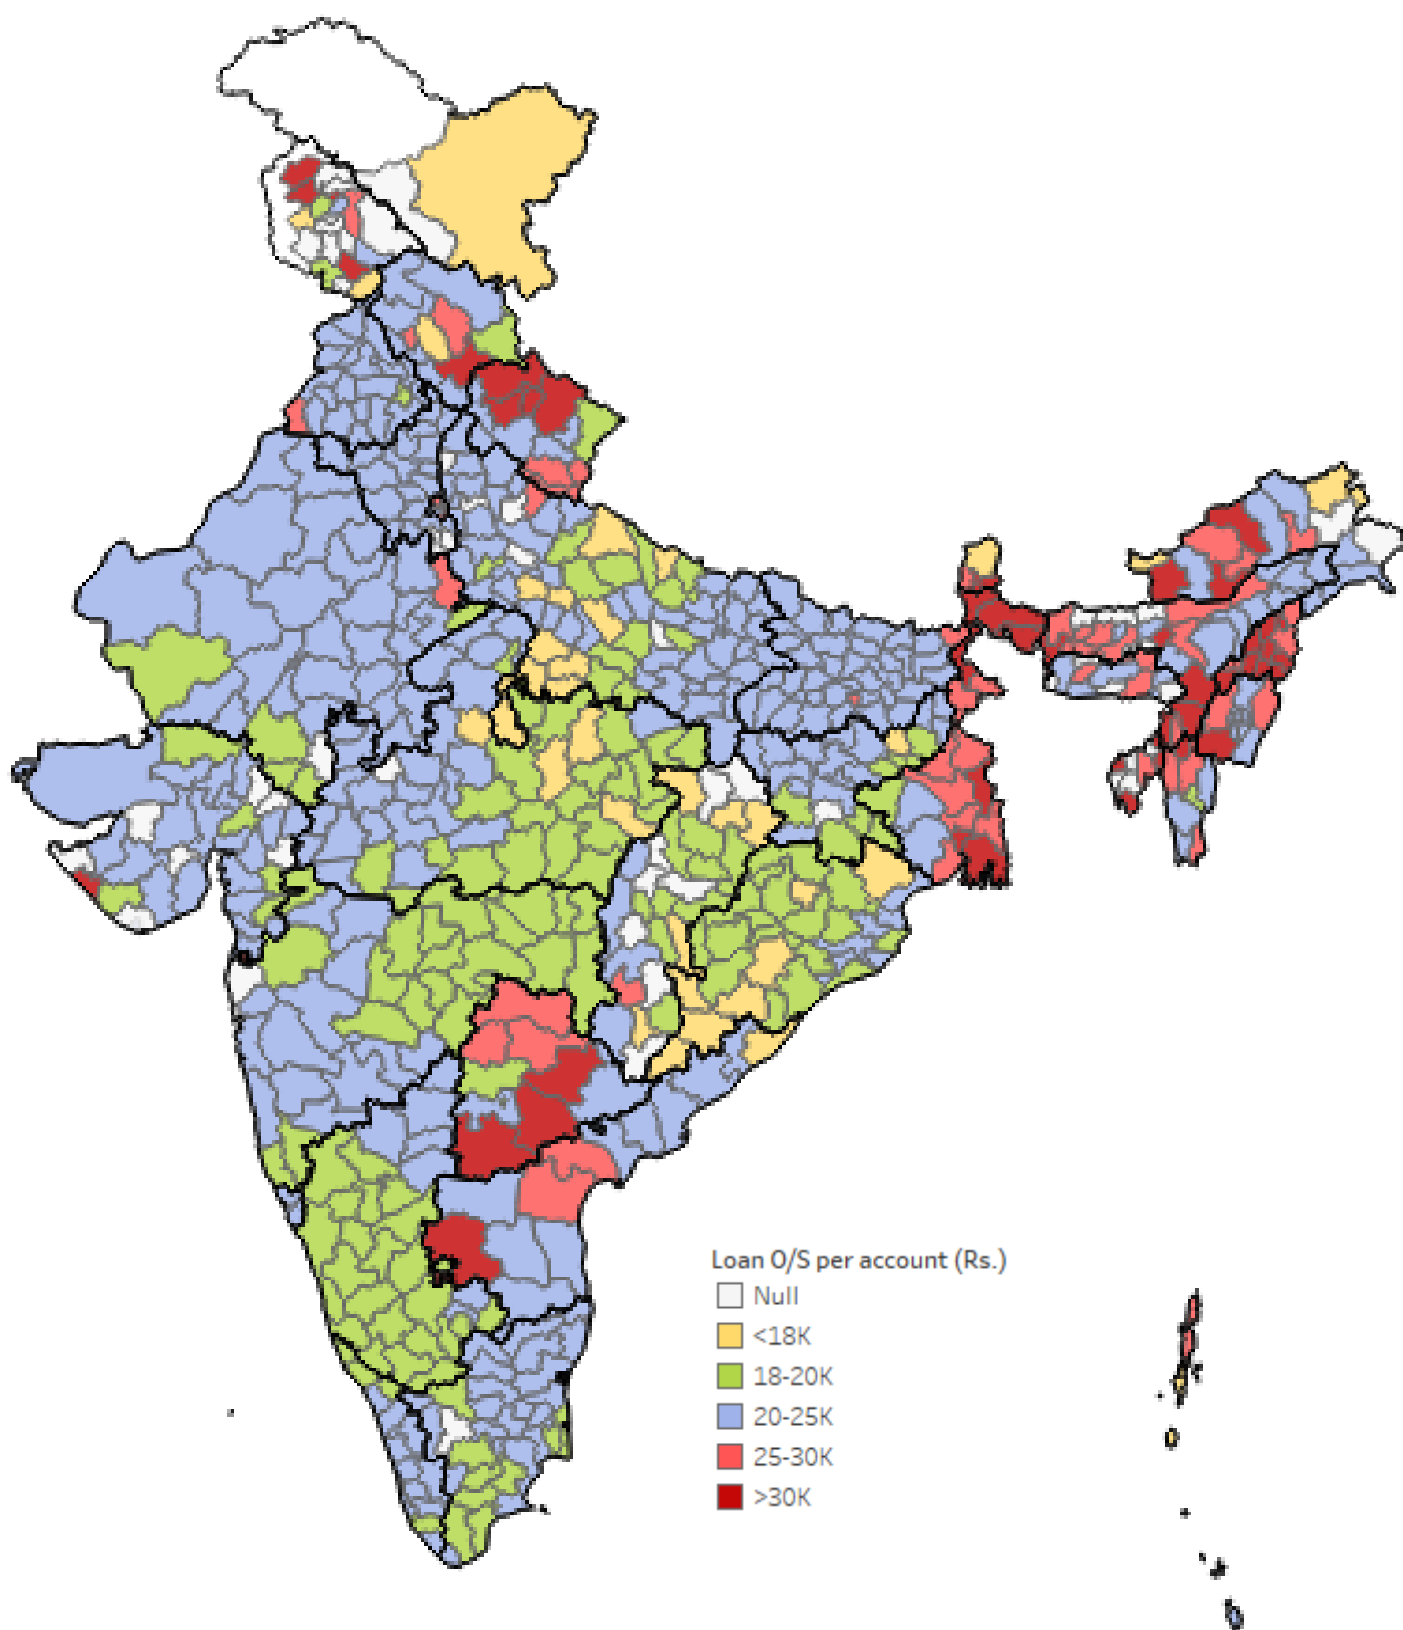

Heat Map 10, illustrates the district wise likely indebtedness based on the ratio of per capita GLP to per capita GDDP. The GLP/GDP (per capita) ratio for India is 26.7%.

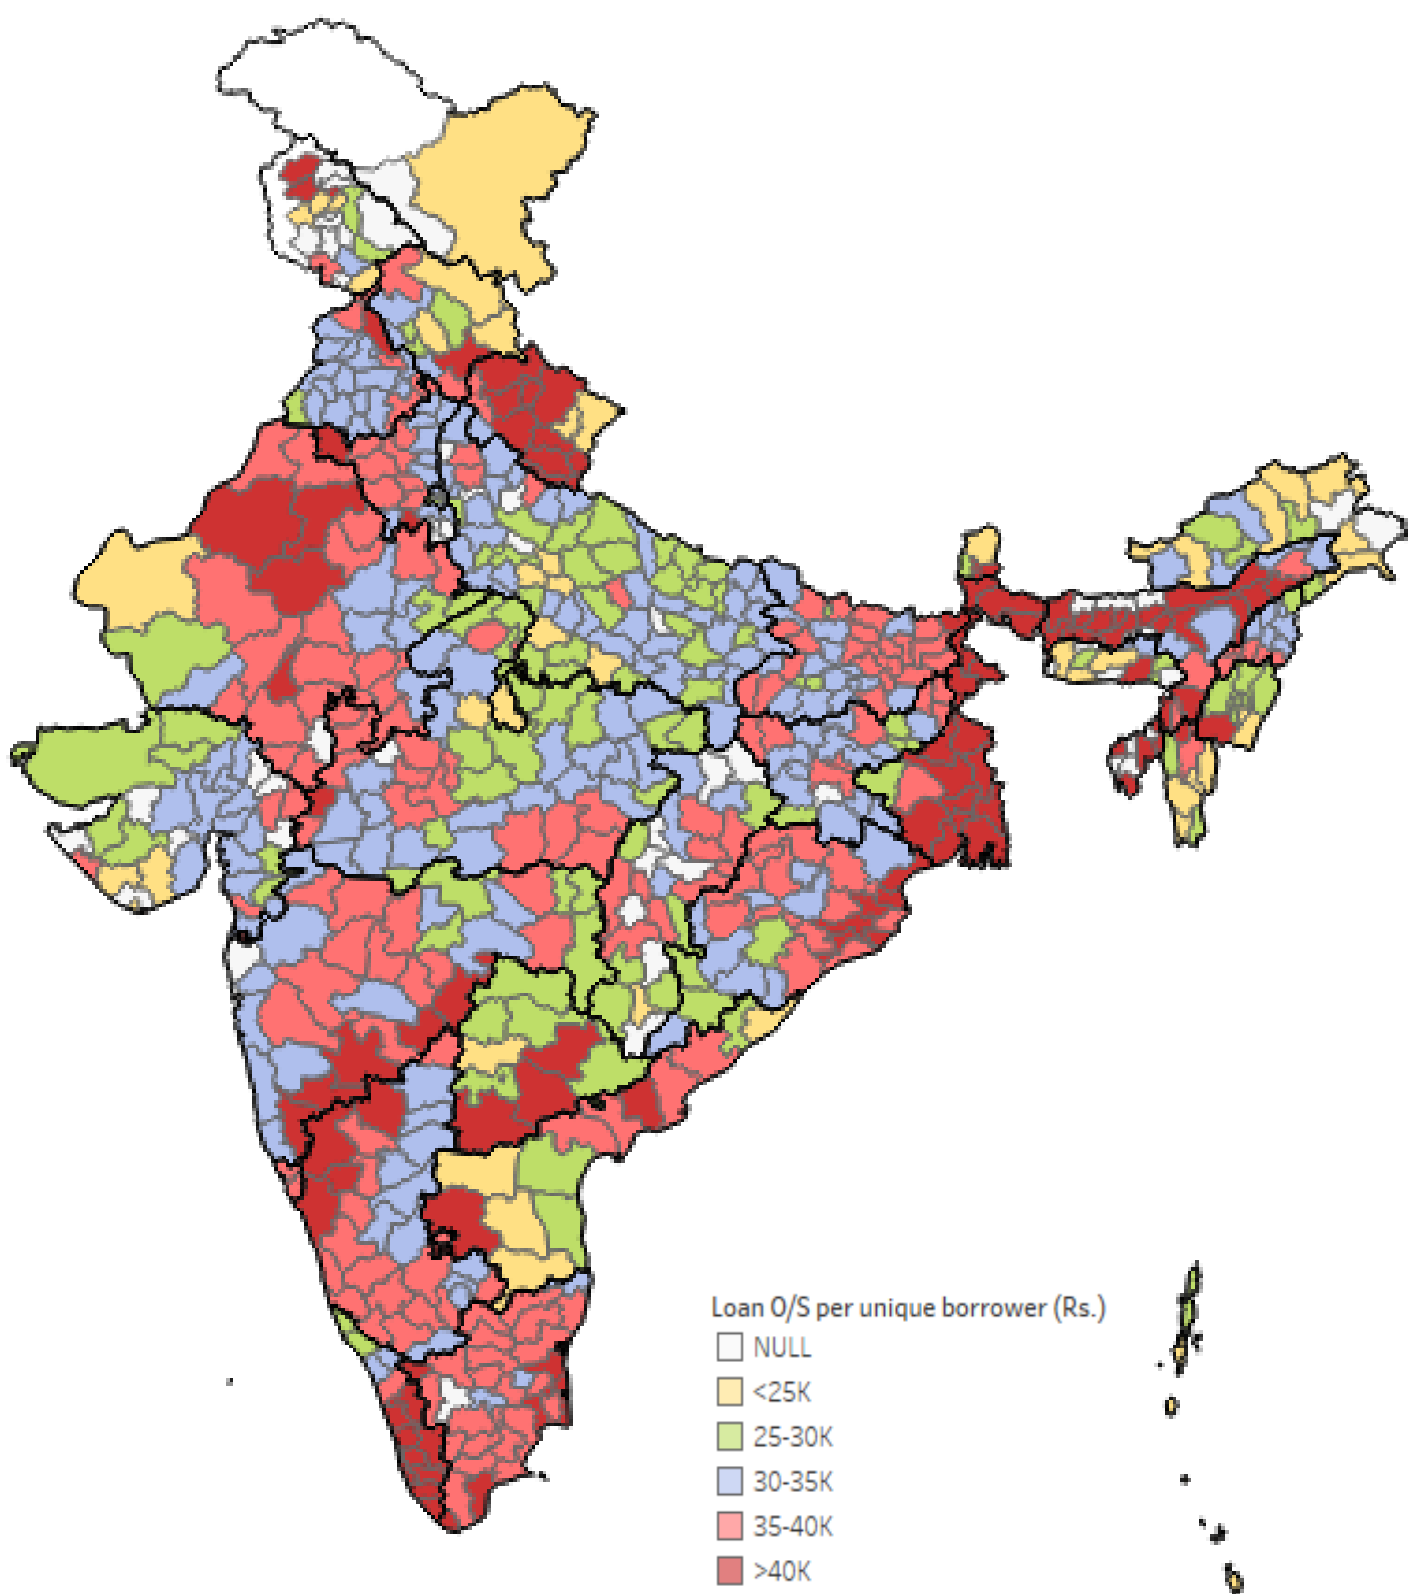

Heat Map 6: Gross loan portfolio (Rs Cr)

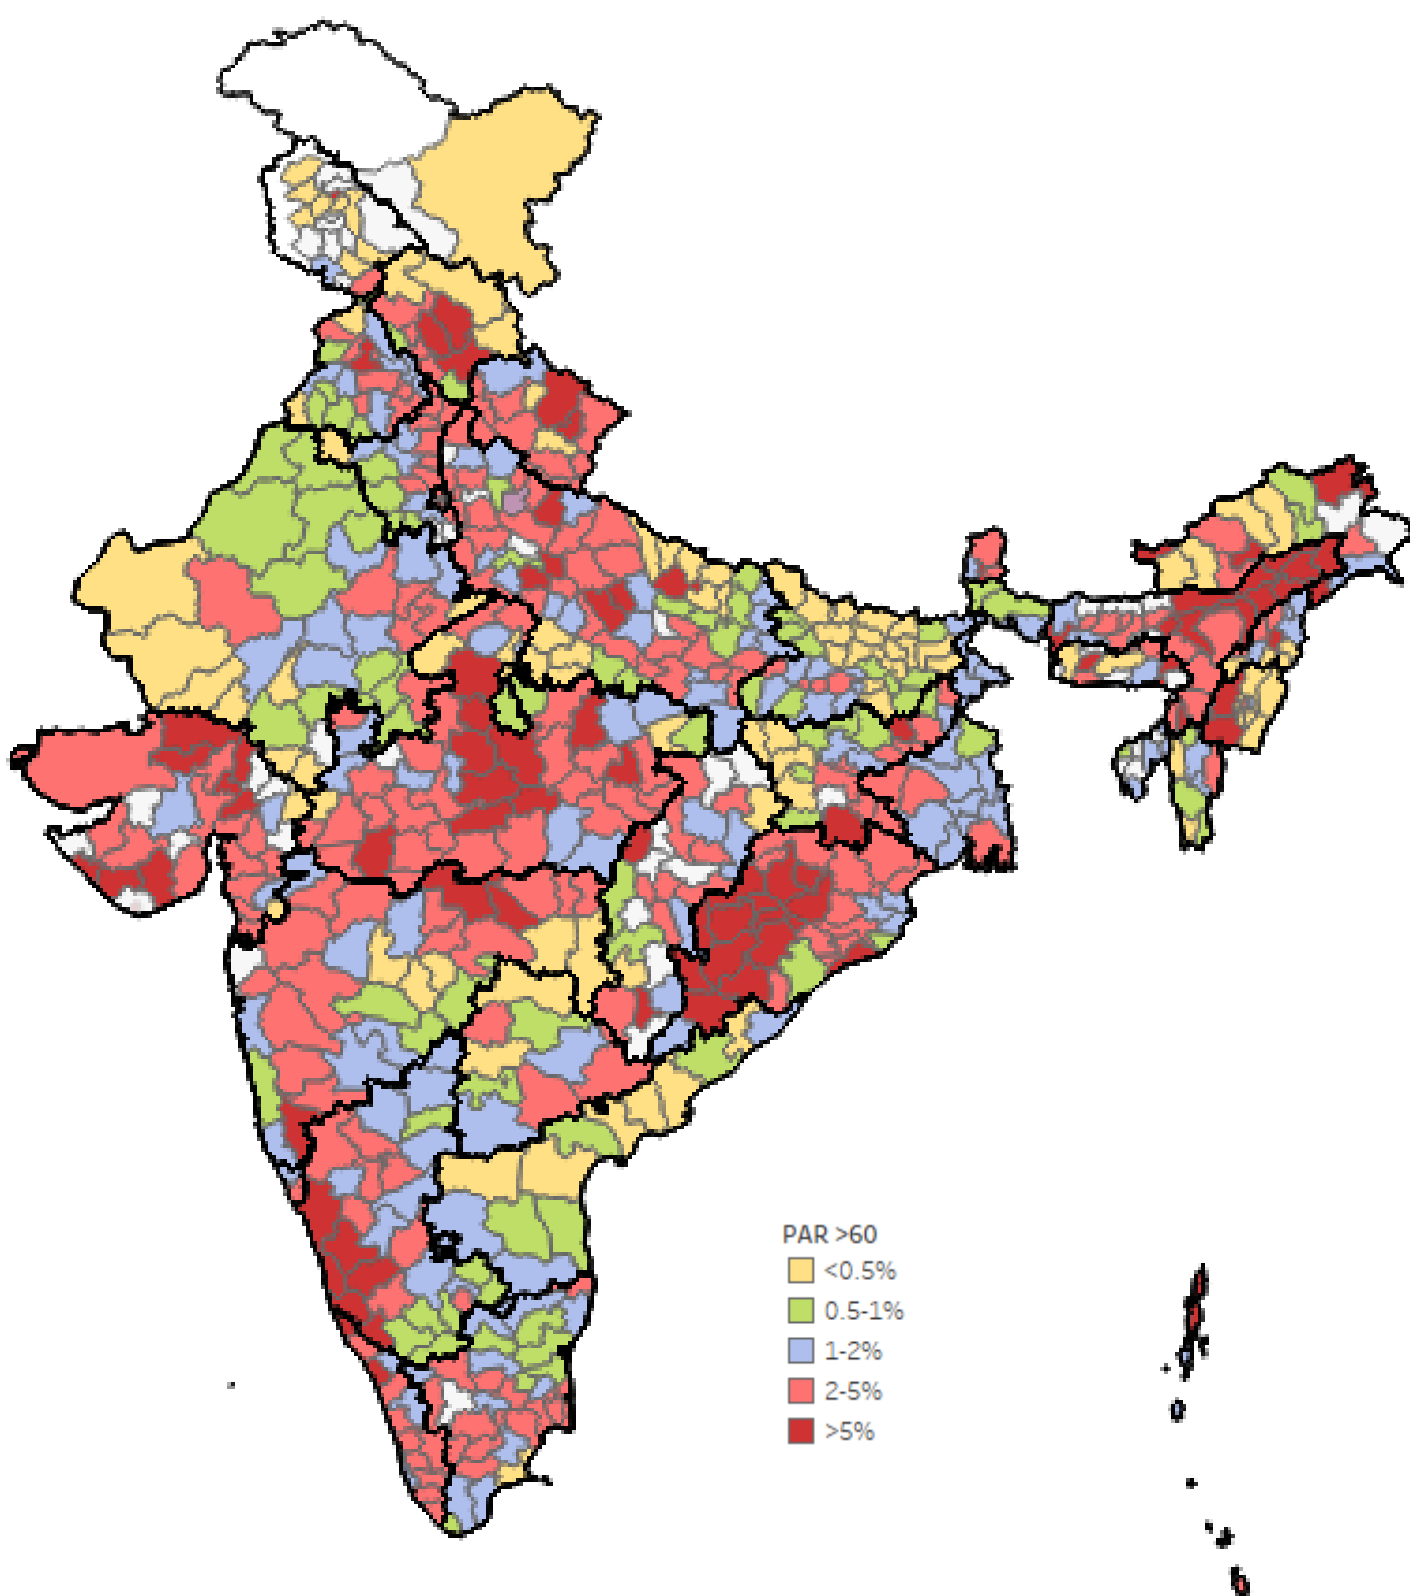

Heat Map 7: Average loan outstanding per account (Rs)

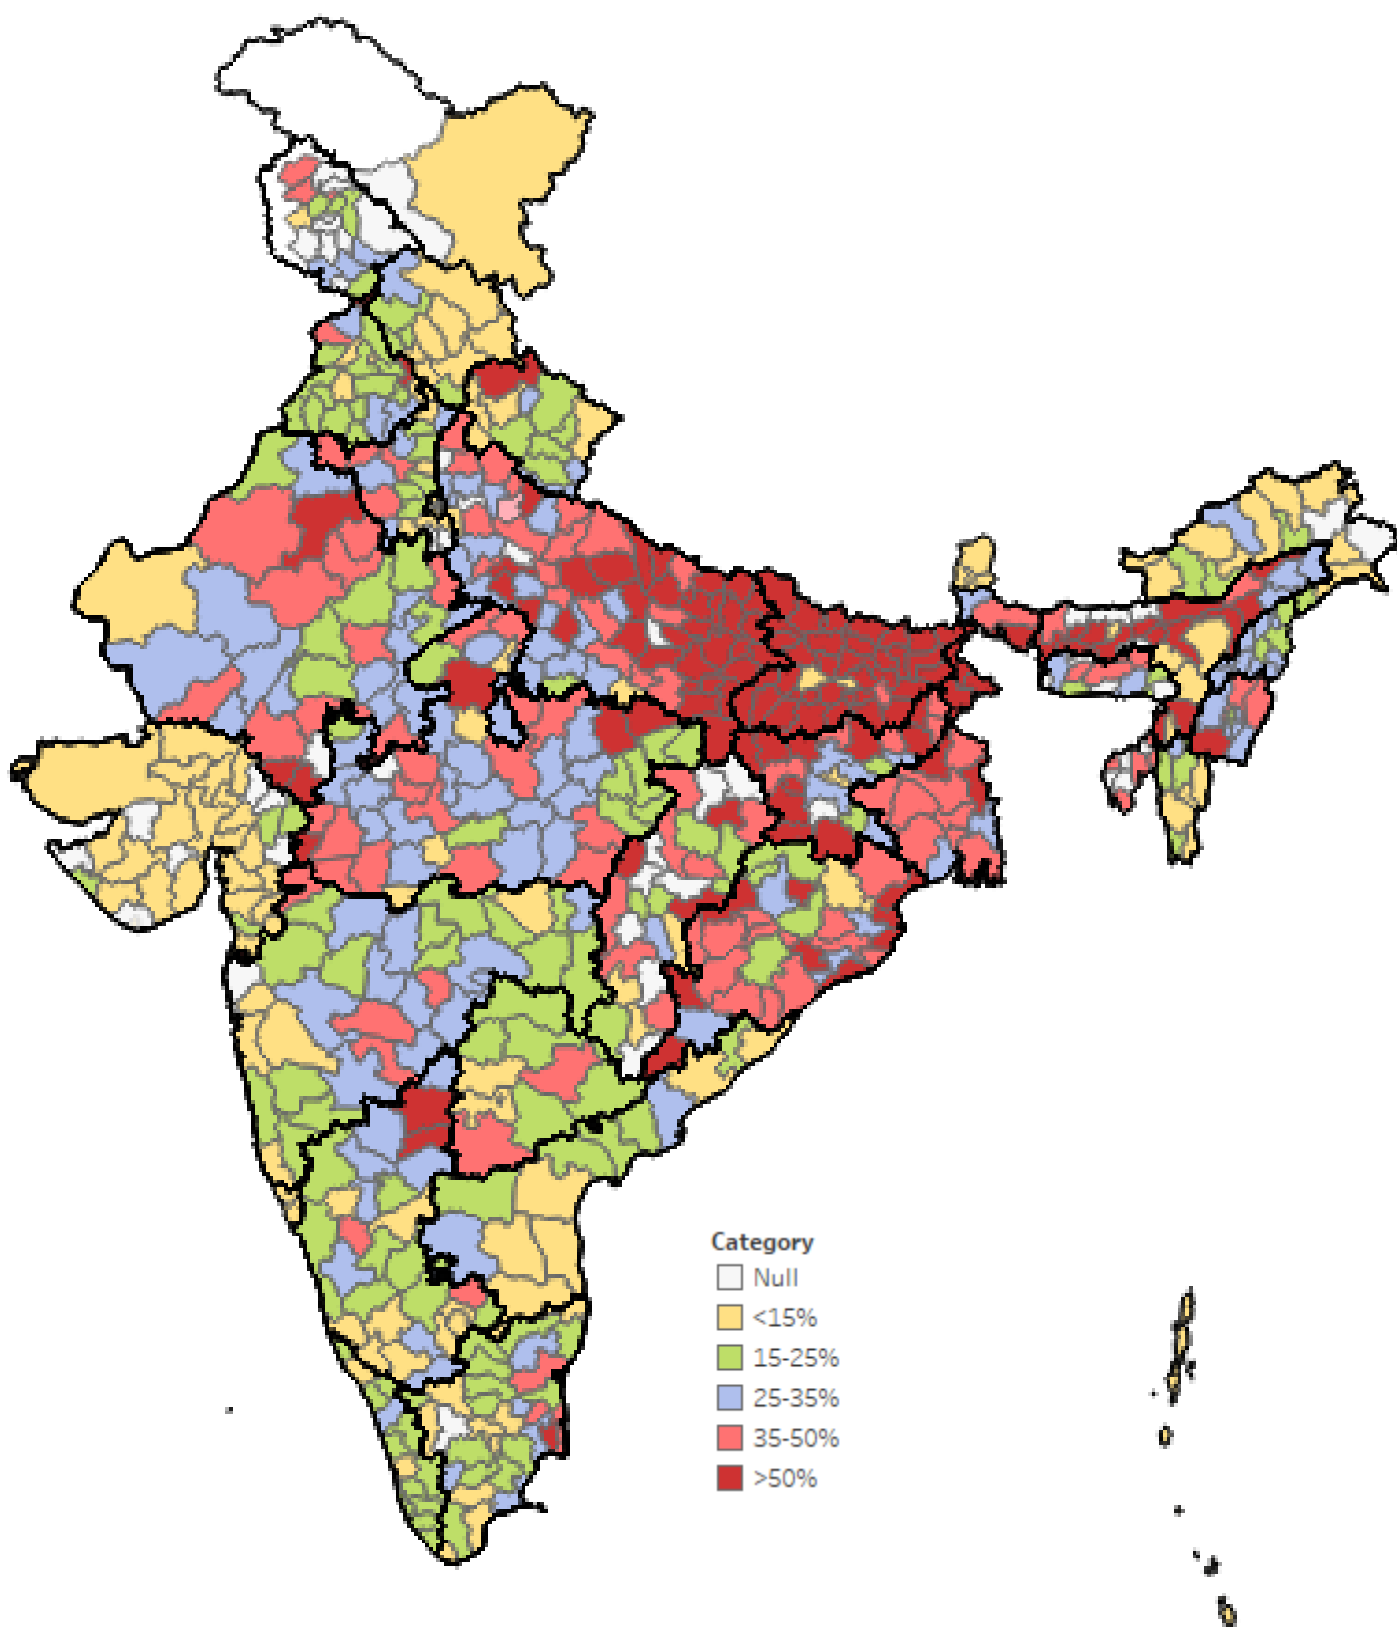

Heat Map 8: Average loan outstanding per unique borrower (Rs)

Heat Map 9: Portfolio at Risk > 60 days – DRI Parameter

Heat Map 10: Per Capita GLP to Per Capita GDDP ratio – **DRI Parameter**

Section 4

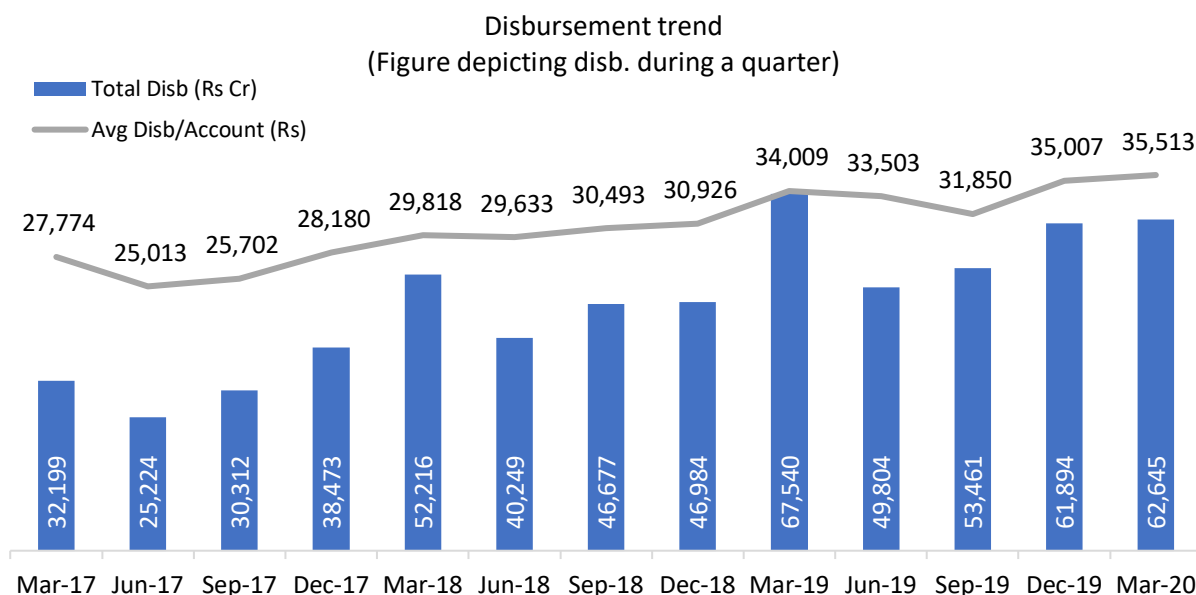

Disbursement Analysis

Disbursement trend

The total amount of loan disbursed during the FY 2019-20 (Apr'19 to Mar'20) is Rs 2,27,807 Cr to 6.70 Cr accounts. In the last two completed FYs (2017-18 and 2018-19) the disbursements grew by 55.8%. The average loan size (per account) has increased by 23.4% from Rs 27,568 for the FY 2017-18 to Rs 34,015 for the FY 2019-20 as shown in the table below.

	FY 2017-18	FY 2018-19	FY 2019-20
Loan amount disbursed (Rs Cr)	1,46,225	2,01,449	2,27,804
Accounts disbursed (Cr)	5.30	6.39	6.70
Average loan size per account (Rs)	27,568	31,505	34,015

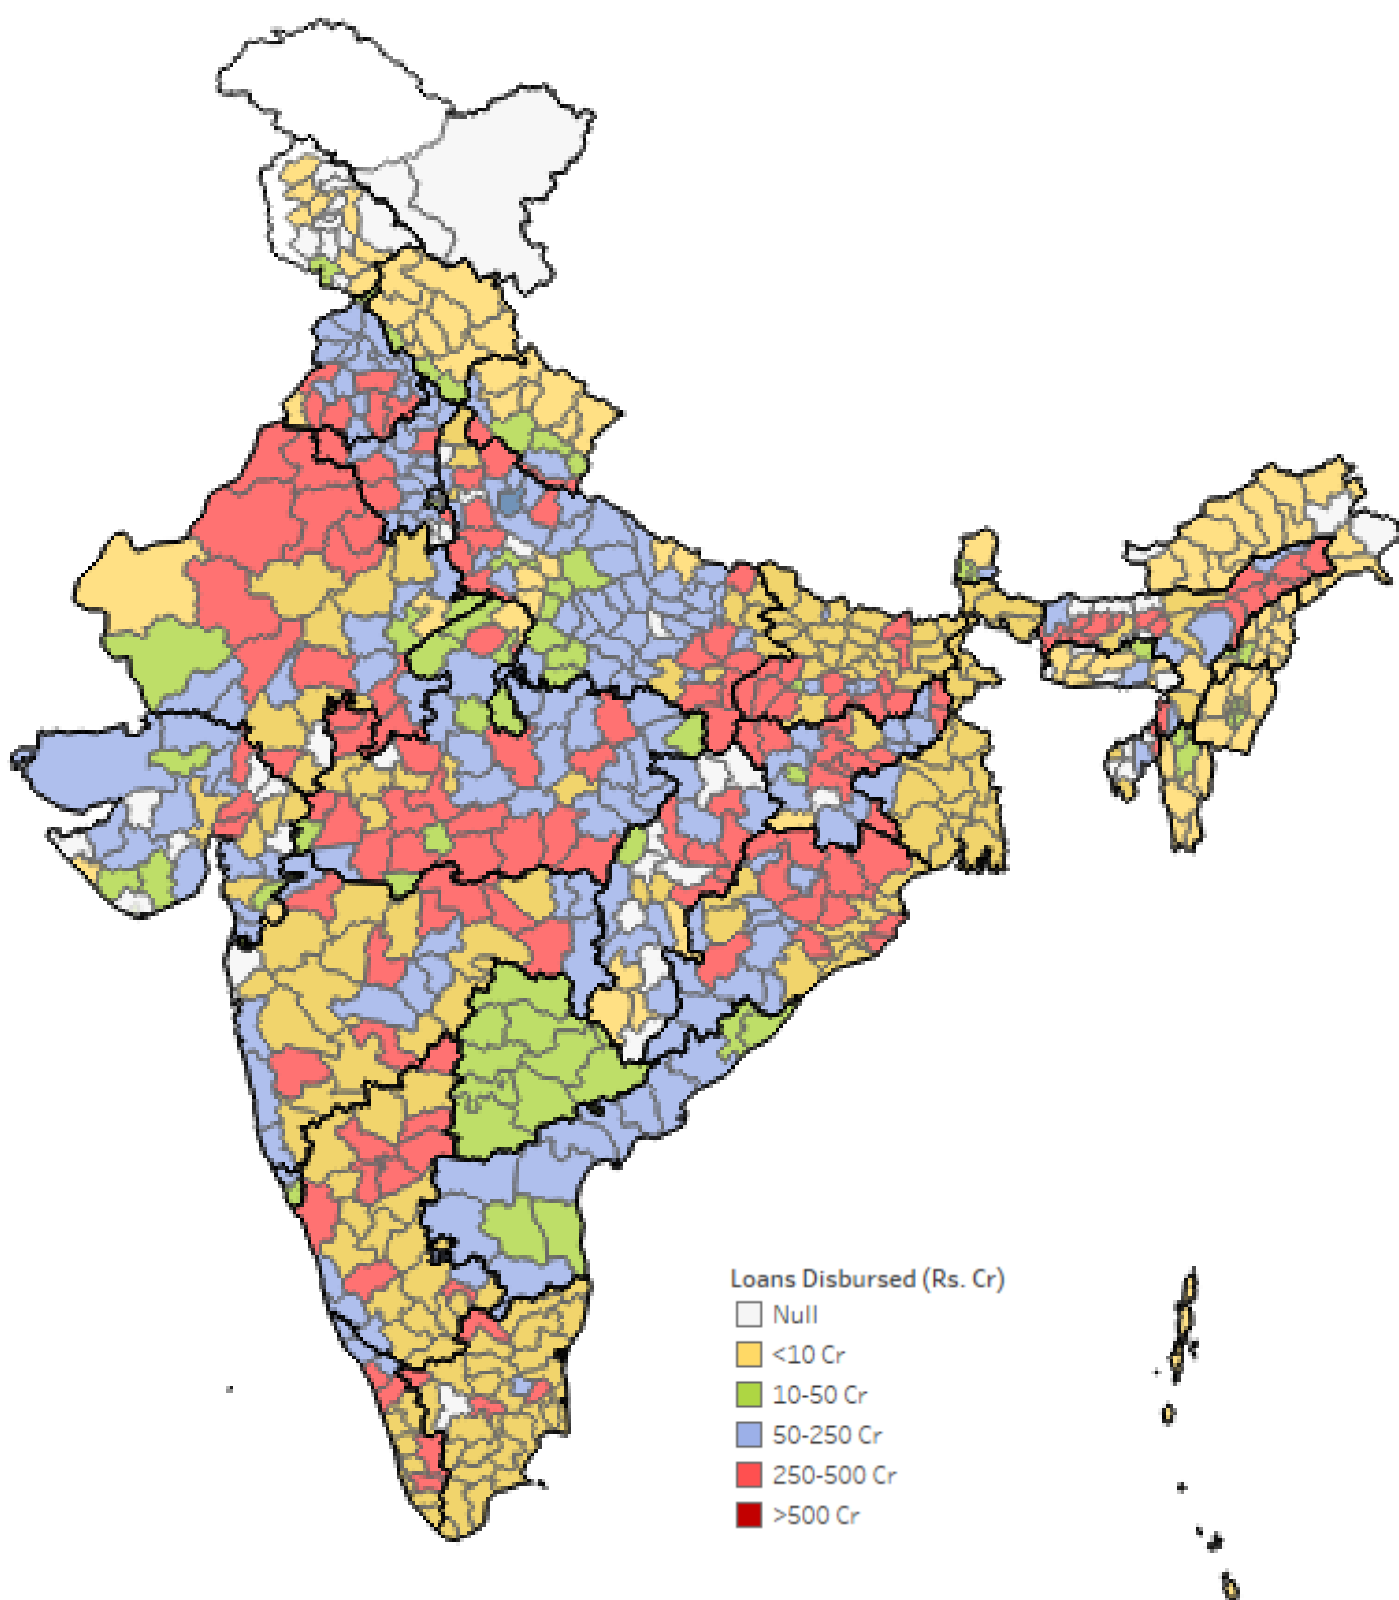

The quarterly disbursement trend since March 2017 is shown in the graph below. It is evident that in each financial year the disbursements peaked (both in terms of amount disbursed as well as average loan size per account) during the last quarter. However, in FY 19-20 there was virtually no growth in the last quarter due to the outset of the Covid-19 crisis, but in the other quarters there was a steady growth.

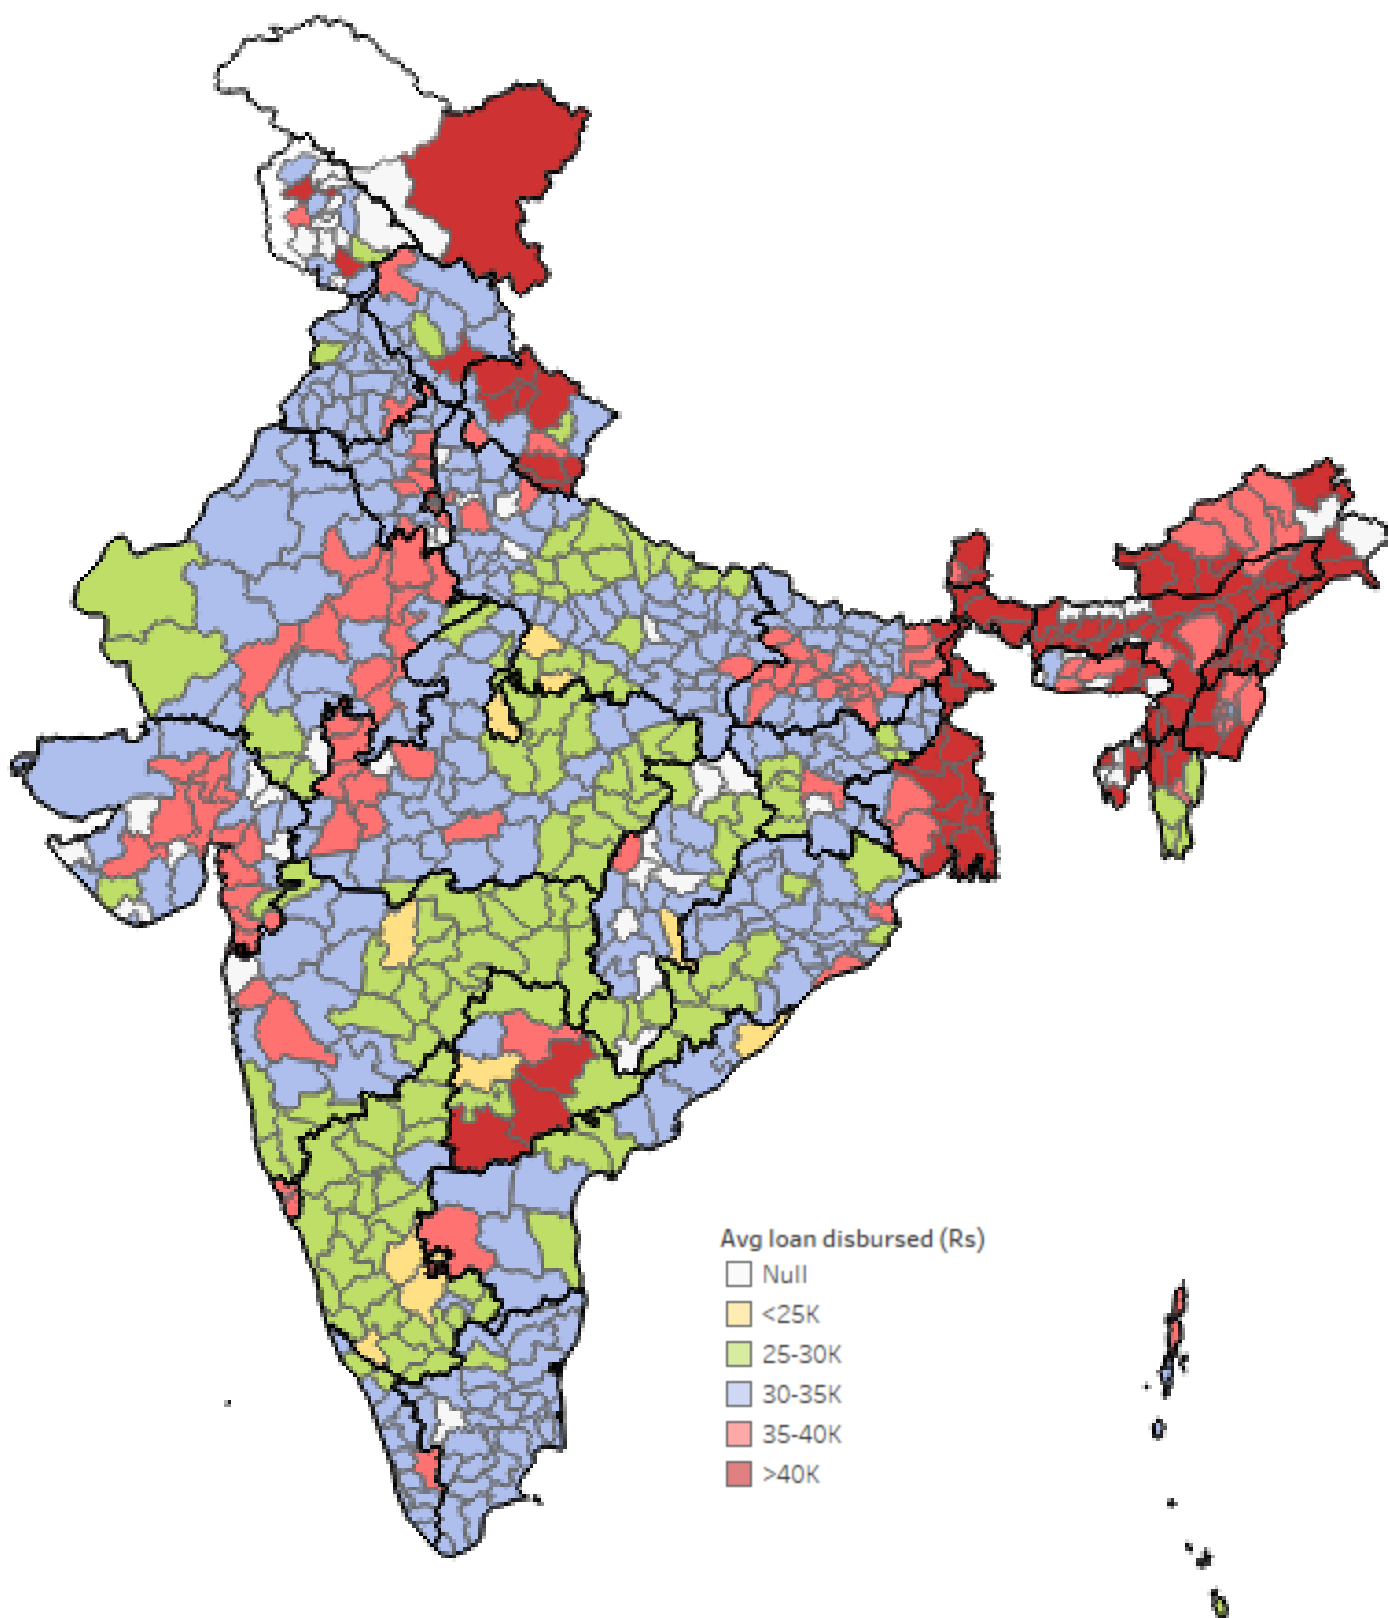

The district wise loan amount disbursed during the FY 2019-20 is displayed in **Heat Map 11** and the average loan disbursed per account is presented in **Heat Map 12**. It is evident that

- 243 districts had average loan size higher than the country average
- Of them 95 districts had average loan size >Rs 40,000, 26 have >Rs 50,000 and 3 have >Rs 60,000
- 18 out of 26 the districts with average loan size >Rs 50,000 are from East and North East region. Arunachal Pradesh (4), Assam (4), Himachal (1), Jammu & Kashmir (1), Manipur (1), Nagaland (6), Sikkim (2), Telangana (1), Tripura (1), Uttarakhand (3) and West Bengal (2).

Heat Map 11: Loan amount (Rs Cr) disbursed during FY 2019-20

Heat Map 12: Average loan disbursed per account (Rs) during FY 2019-20

Section 5

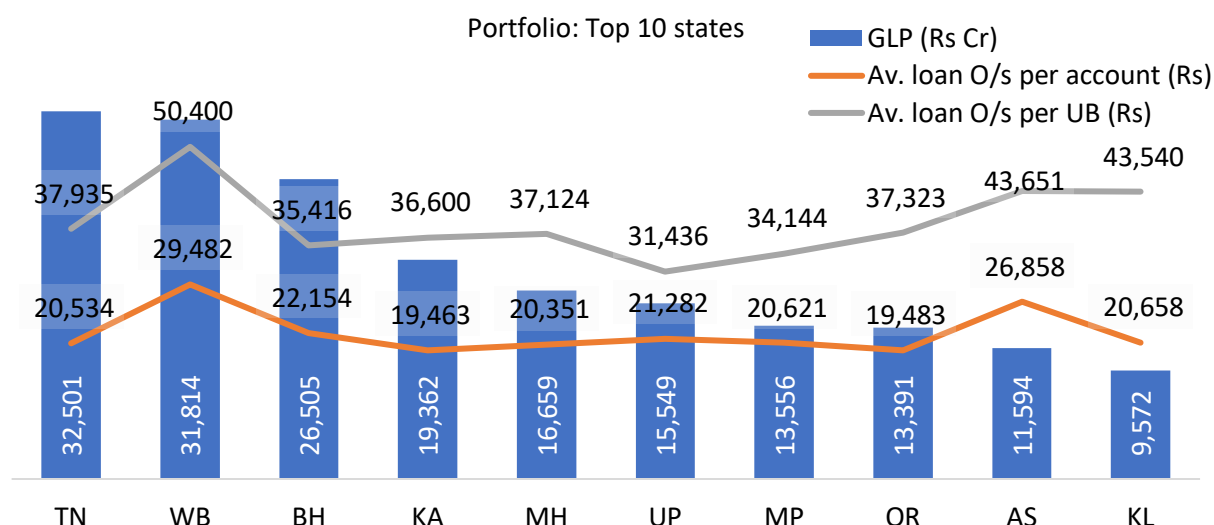

Top States, Top Districts & DRI

Top ten states

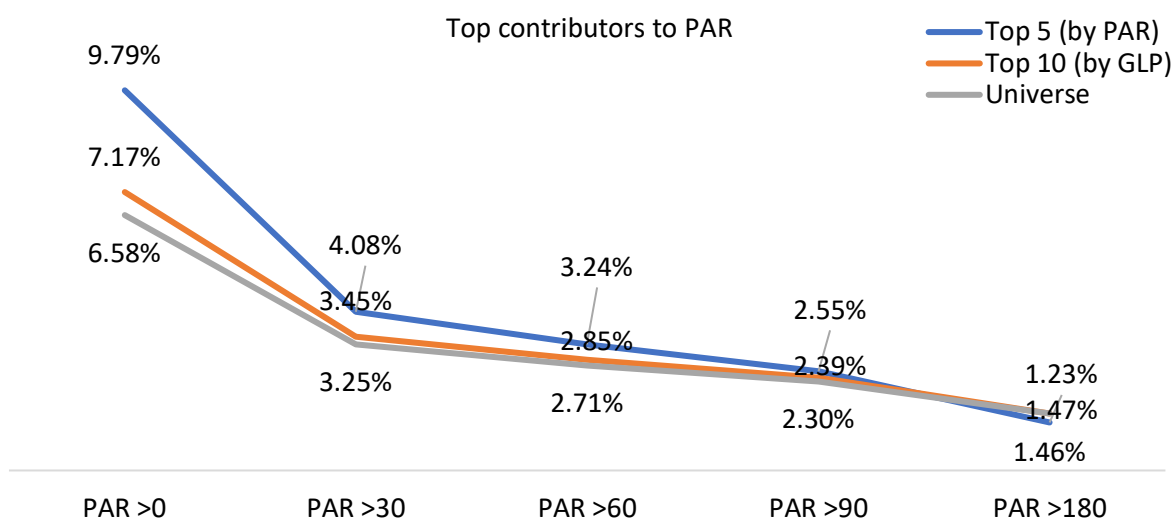

As on 31 March 2020, the Top 10 states in terms of GLP, account for 82.2% of the universe GLP. The contribution of these states in terms of accounts and unique borrowers is also very significant as shown in the table below.

	GLP (Rs Cr)	Accounts (Cr)	Unique Borrowers (Cr)
Top 10 States (in GLP)	1,90,503	8.64	4.95
Universe	2,31,788	10.55	5.89
Contribution of Top 10	82.19%	82.02%	84.02%

The GLP of Top 10 states and average loan outstanding per account and per unique borrower is shown in the figure below. The **largest state is Tamil Nadu** with a GLP of Rs 32,501 Cr closely followed by **West Bengal** having a GLP of Rs 31,814 Cr.

The contribution of Top 10 states to universe PAR >30 is 87.34% and to PAR >90 is 85.64%. The Top 5 PAR contributing states are Kerala, Assam, Tamil Nadu, West Bengal and Karnataka. Together they account for 65.08% of universe PAR >30 and 58.65% of PAR >90.

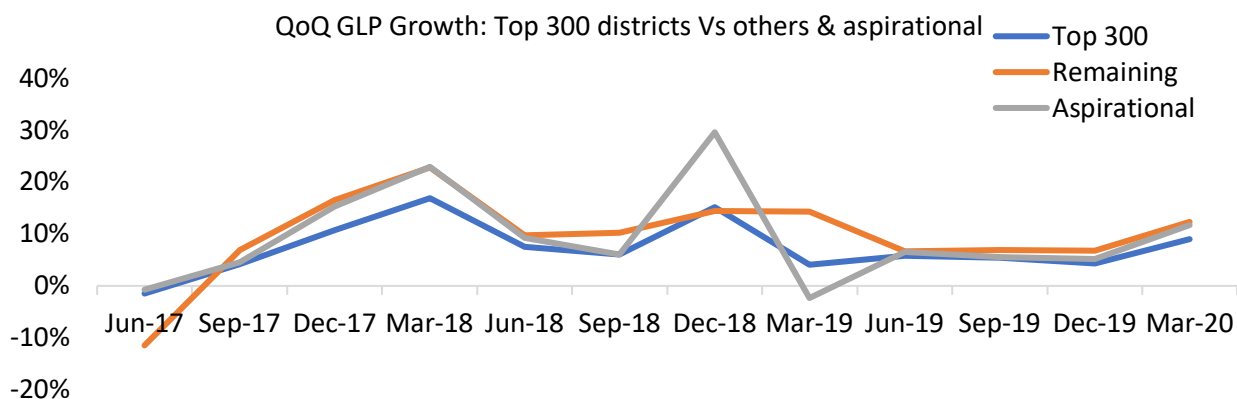

Top districts

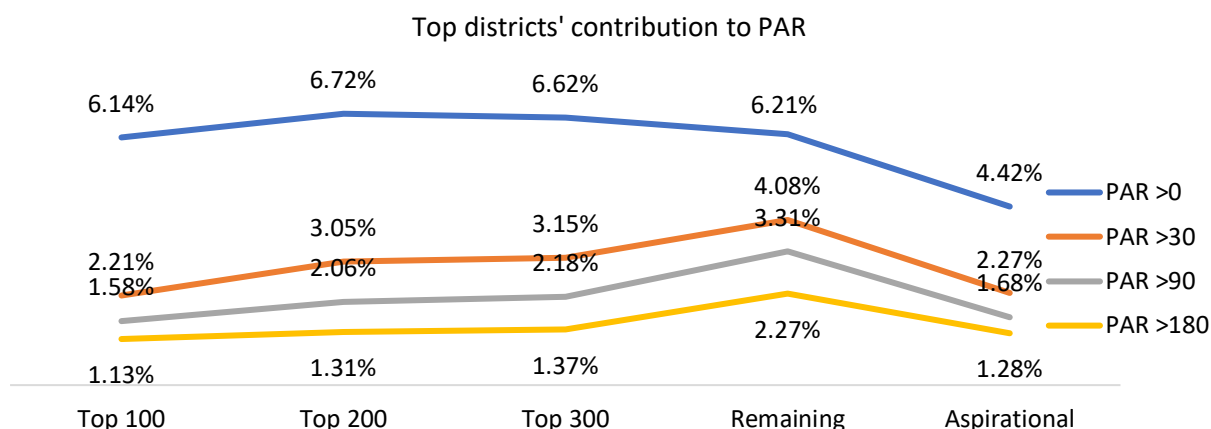

As evident from the table below, while microfinance is present in 620 districts, the operations are concentrated in the Top 300 districts which contribute to almost 90% of the universe GLP. Microfinance services are being provided in 106 out of 115 aspirational districts and their contribution to the universe GLP is about 15.6%, though the depth of outreach is nearly 9% lower than the Top 300 districts indicating good scope of expansion in these districts.

Districts	GLP (Rs Cr)	GLP (% of Univ.)	Unique Borrowers (Cr)	UB (% of Univ.)	Depth of outreach
Top 100	1,22,422	52.8%	3.00	50.9%	49.3%
Top 200	1,76,070	76.0%	4.46	75.6%	45.9%
Top 300	2,07,935	89.7%	5.37	91.1%	42.9%
Remaining 319	23,852	10.3%	0.74	12.5%	11.2%
Aspirational 106	36,185	15.6%	0.95	16.1%	34.2%
Universe	2,31,788		5.89		30.84%

The graph below compares the growth of portfolio in the Top 300 districts, remaining districts and aspirational districts, based on data on loans originated after February 2017. The CAGR GLP from Mar'17 to Mar'20 for 'ever' loans has been 32.28%, 39.55% and 41.64% respectively for Top 300, remaining and aspirational districts. It does indicate that the FIs have started exploring other districts apart from those where they already have a strong presence.

The PAR analysis of Top districts in comparison to remaining and aspirations districts is shown in the graph below. It is evident that that despite concentration of operations in Top 300 districts, the PAR levels are better in comparison to other remaining districts. PAR level of aspirational districts are comparatively better than the top districts. 49 aspirational districts feature in Top 300.

District Risk Index

The DRI provides a consolidated view of district wise risk in microfinance operations. As explained in the note on page 4, DRI takes into account five risk factors to calculate the index– multiple loans, density of FIs, depth of outreach, indebtedness and portfolio quality as measured by PAR 60.

For analysis, the DRI has been classified into five categories based on combined risk scores of all parameters. These are

Very High: >75%

High: >=60% to 75%

Moderate: >=45% to <60%

Low: >=25% to <45%

Very Low: <25%

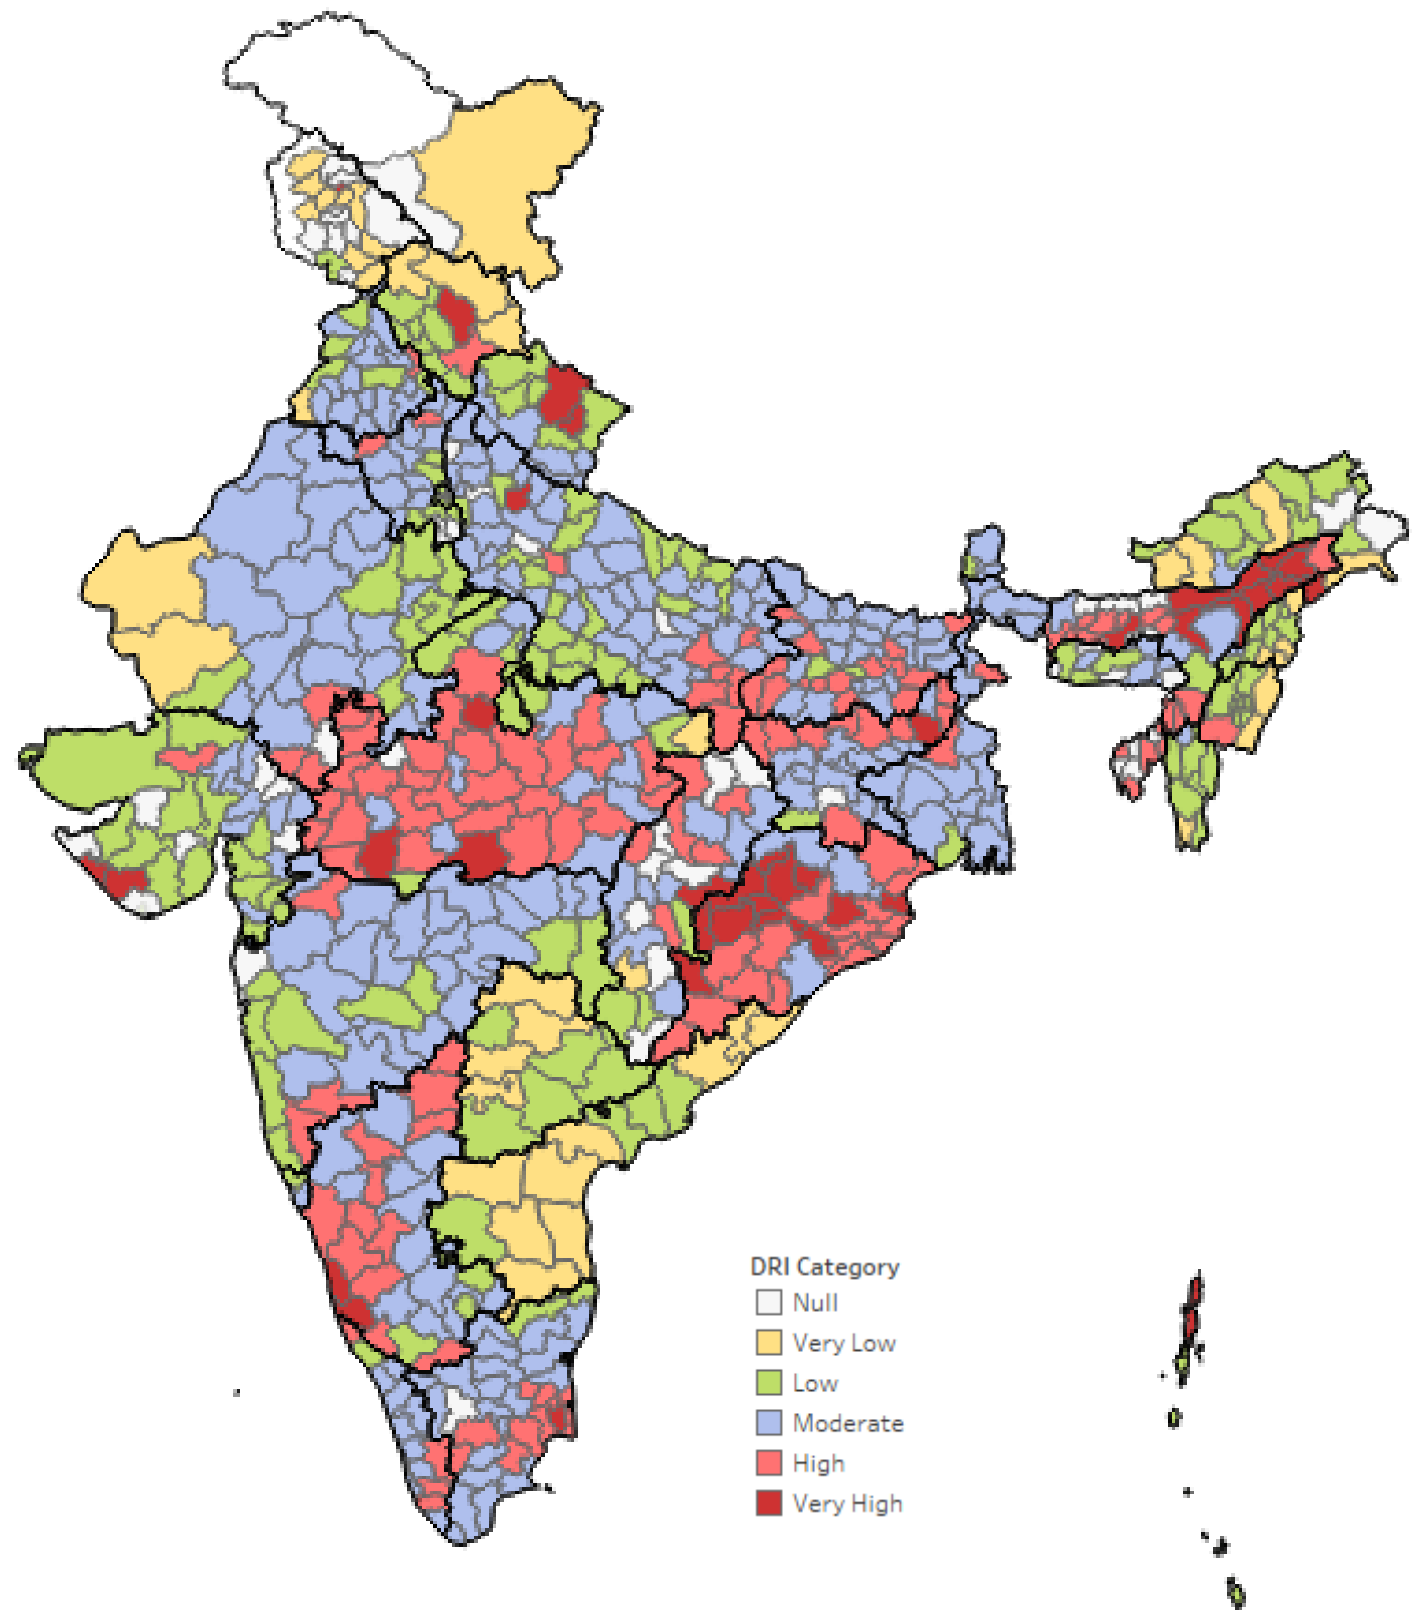

The table below shows the number of districts in various DRI categories. Districts with very high and high DRI are 28% of the 620 districts where microfinance operations are present. Districts with moderate DRI are around 41% of the total and 31% have low and very low DRI. It is also evident that not every large district in terms of GLP feature in Very High or High risk category. However, none of them feature in the very low risk category.

Heat Map 13 on the next page depicts the district wise DRI. The major states with large number of districts featuring in Very High and High risk categories are as below

- Very High: Odisha (12), Assam (9), Madhya Pradesh (3), Uttarakhand (2), Karnataka (2), Gujarat (2), and 8 other states with 1 each
- High: Madhya Pradesh (28), Odisha (15), Bihar (15), Karnataka (12), Assam (11), Jharkhand (9), Tamil Nadu (8), UP (7), Chhattisgarh (6), Kerala (4), Tripura (4), West Bengal (4), Maharashtra (3), Rajasthan (3), Haryana (2), 5 other states with 1 each

DRI	No. of districts	% of Universe GLP	Of which in Top 100	Of which in Top 200	Of which in Top 300
Very High	38	6.0%	5	15	19
High	136	25.8%	24	61	98
Moderate	254	58.0%	62	109	163
Low	149	9.9%	9	15	20
Very Low	44	0.3%	0	0	0

Heat Map 13: District Risk Index

Annex 1: State Wise Data

State	No of Active FI's	GLP (Cr)	GLP Rank	Unique Borrowers ('000)	No of Active Accounts ('000)	PAR >0	PAR >30	PAR >60	PAR >90	PAR >180
Andaman & Nicobar	16	5.3	36	4.5	4.5	2.43%	2.15%	2.01%	1.84%	1.53%
